

Annexe X

Distributions de contrôle – $H \rightarrow \tau\tau$

Cette annexe présente des distributions de contrôle sur les événements utilisés dans l'analyse des événements $H \rightarrow \tau\tau$ présentée dans le chapitre 4. La sélection est « inclusive », les événements sont ceux sélectionnés par la définition de la région de signal, sans coupure sur m_T^ℓ (canaux $\mu\tau_h, e\tau_h$) ni D_ζ (canal $e\mu$).

Pour chacune des trois années de prise de données (2016, 2017, 2018) et chacun des quatre canaux ($\tau_h\tau_h, \mu\tau_h, e\tau_h, e\mu$), les distributions de plusieurs variables sont données.

2 ANNEXE X. DISTRIBUTIONS DE CONTRÔLE – $H \rightarrow \tau\tau$

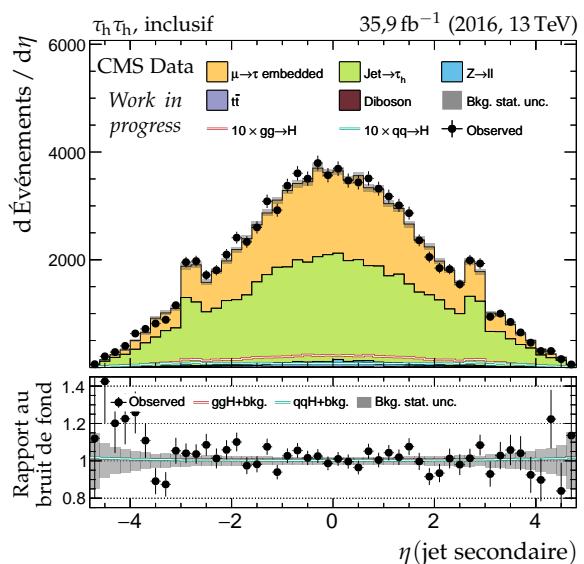

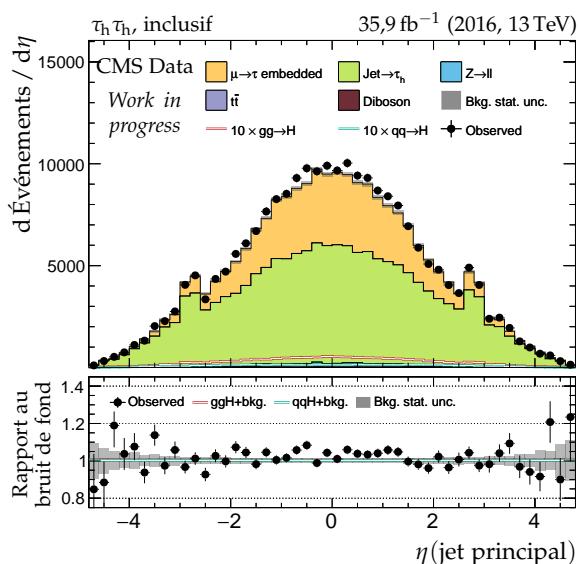

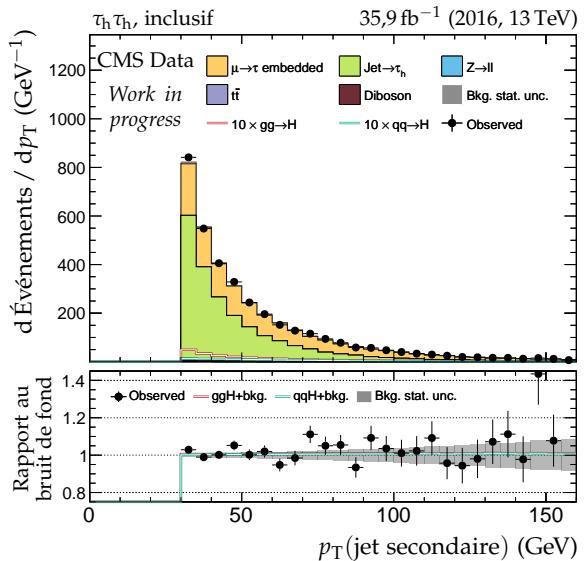

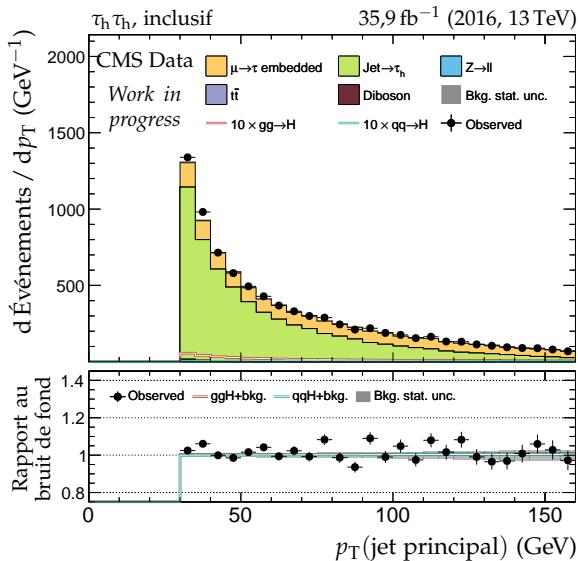

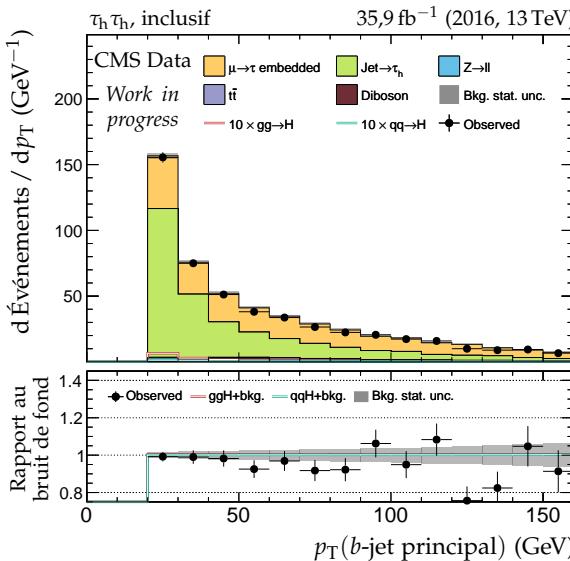

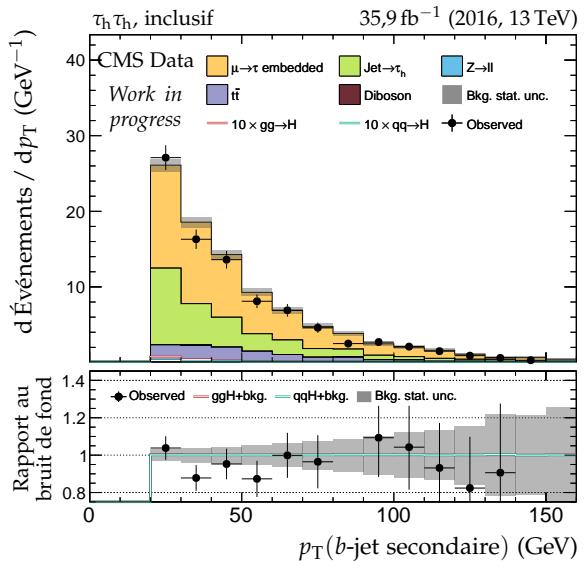

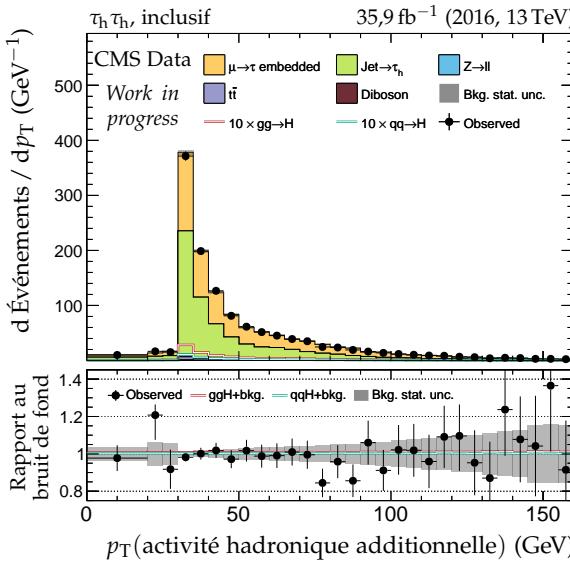

Figure X.1 – Canal $\tau_h\tau_h$, 2016 : cinématique des deux jets principaux.

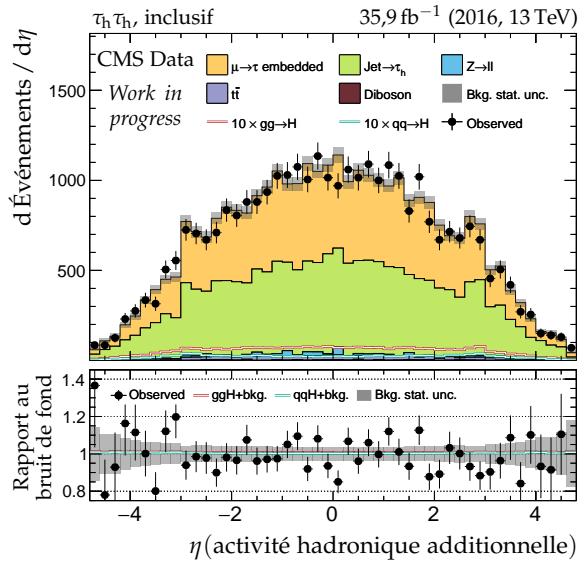

(a) Impulsion transverse du b-jet principal.

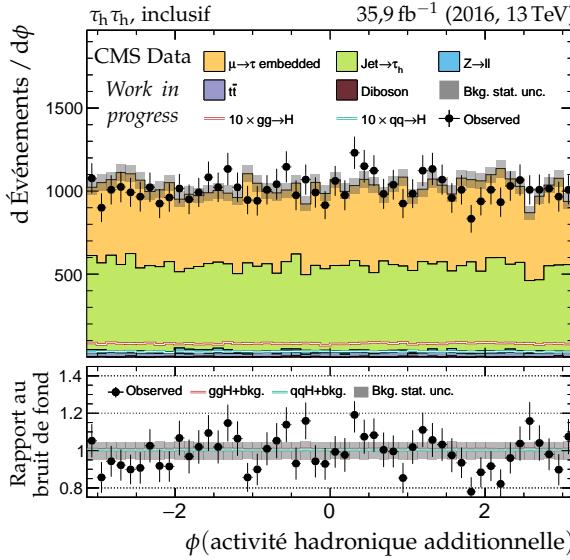

(b) Impulsion transverse du b-jet secondaire.

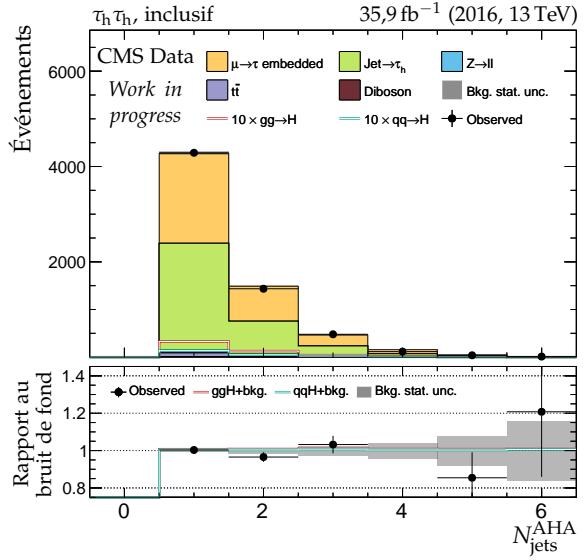

(c) Impulsion transverse de l'AHA.

(d) Pseudo-rapidité de l'AHA.

(e) Angle azimutal de l'AHA.

(f) Nombre de jets dans l'AHA.

Figure X.2 – Canal $\tau_h \tau_h$, 2016 : b-jets et activité hadronique additionnelle.

4 ANNEXE X. DISTRIBUTIONS DE CONTRÔLE – $H \rightarrow \tau\tau$

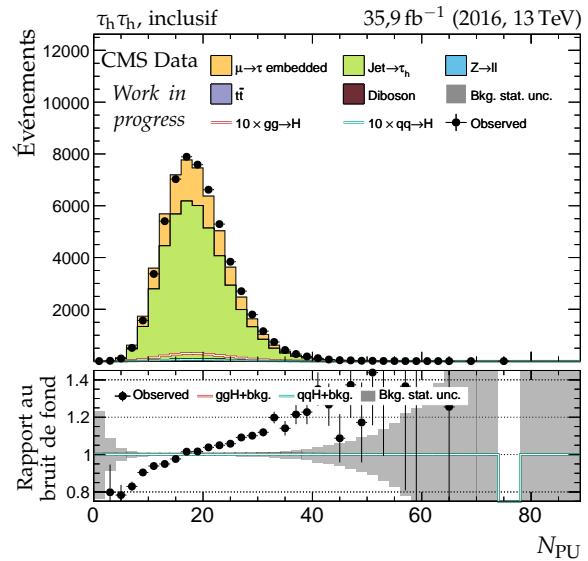

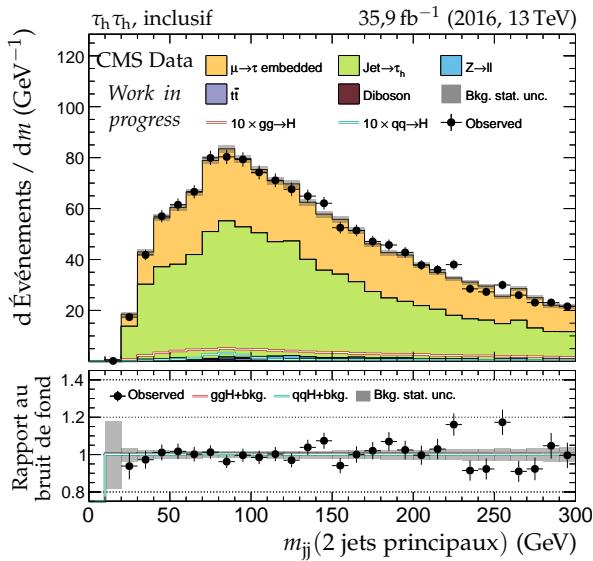

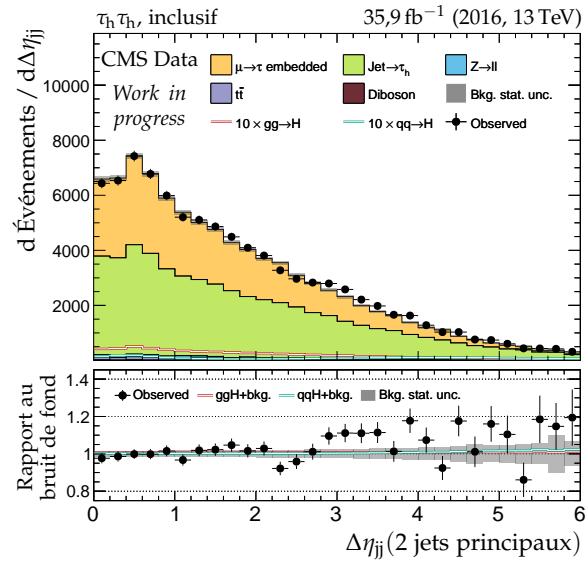

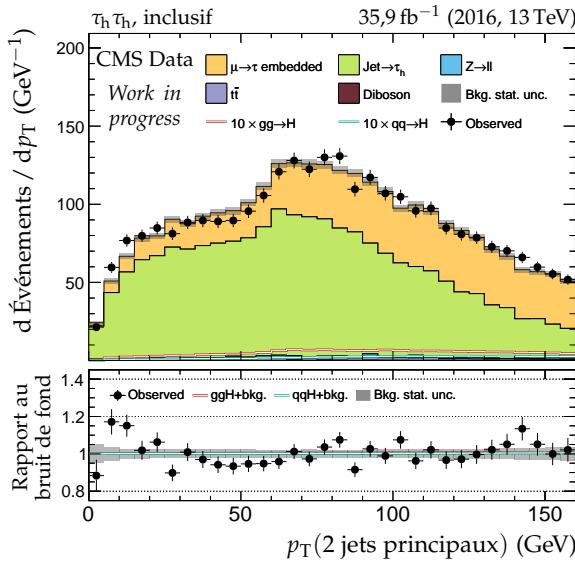

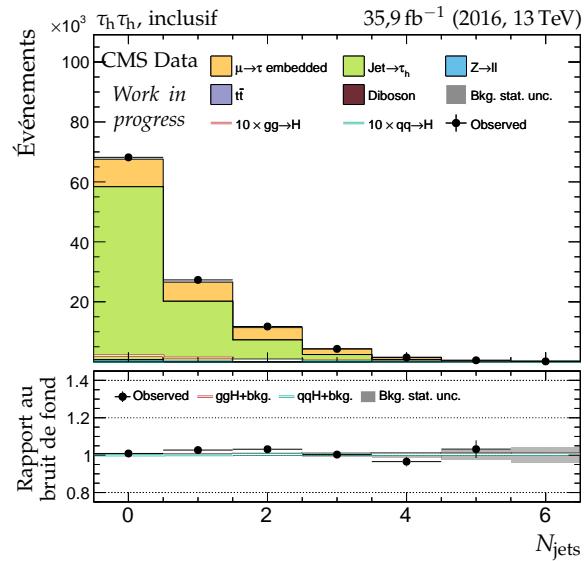

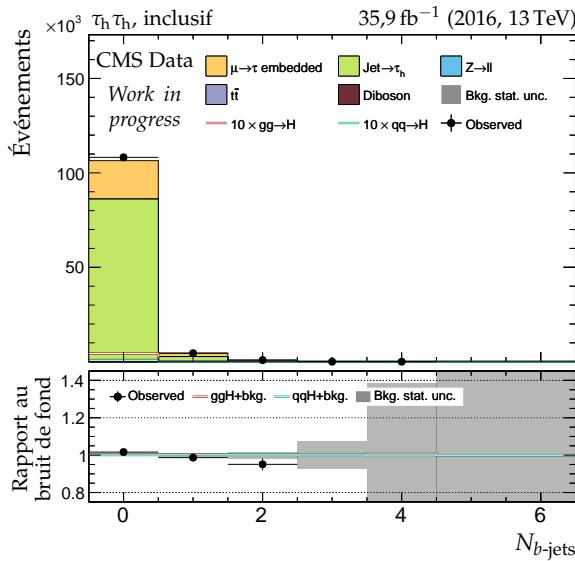

Figure X.3 – Canal $\tau_h \tau_h$, 2016 : nombre de jets, système des deux jets principaux et empilement.

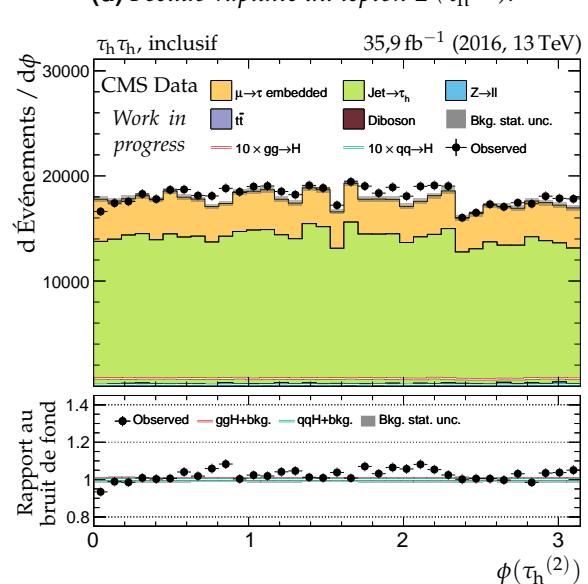

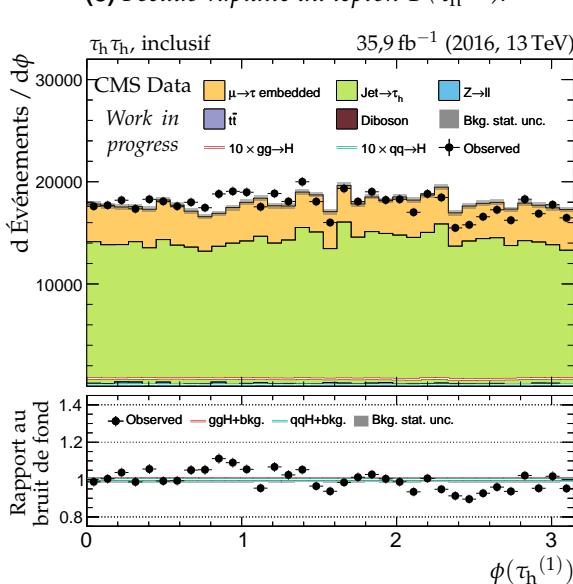

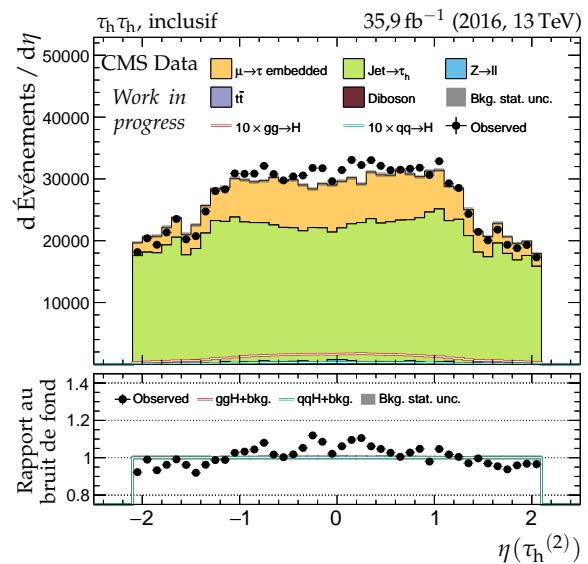

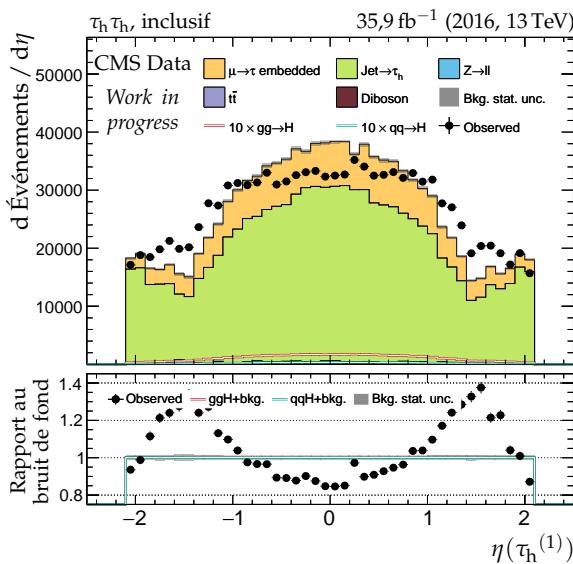

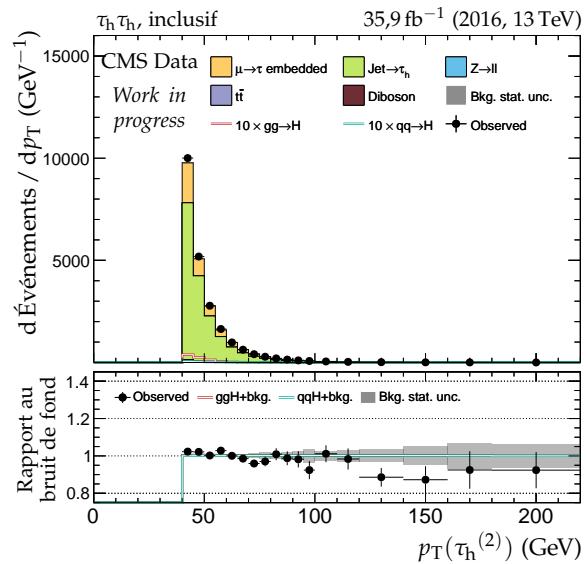

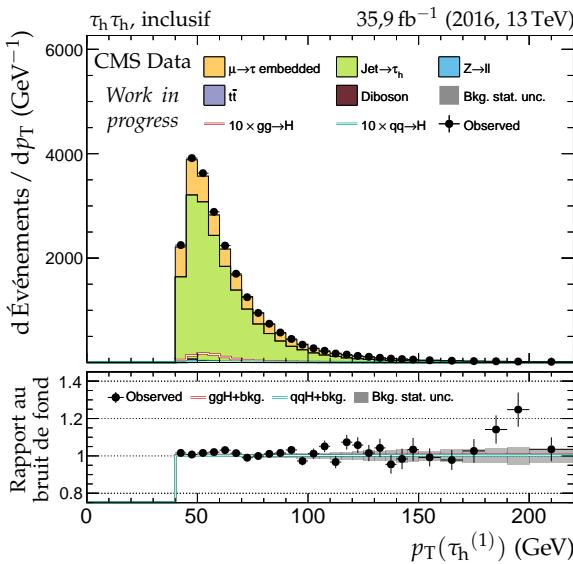

Figure X.4 – Canal $\tau_h \tau_h$, 2016 : cinématique des leptons ($\tau_h^{(1)}, \tau_h^{(2)}$).

6 ANNEXE X. DISTRIBUTIONS DE CONTRÔLE – $H \rightarrow \tau\tau$

Figure X.5 – Canal $\tau_h \tau_h$, 2016 : dilepton et énergie transverse manquante.

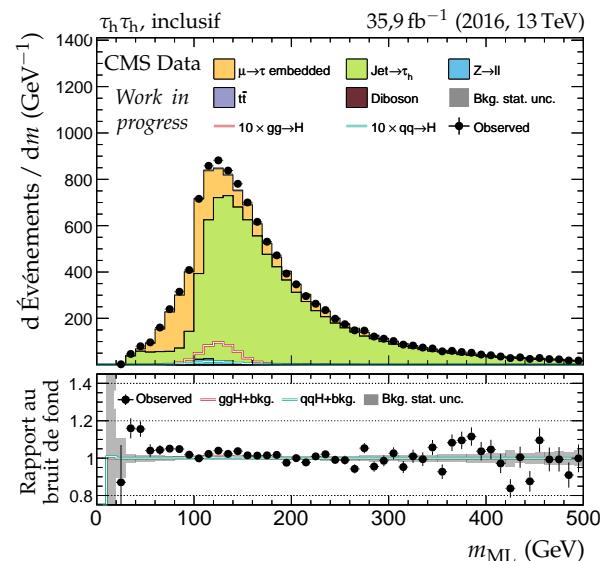

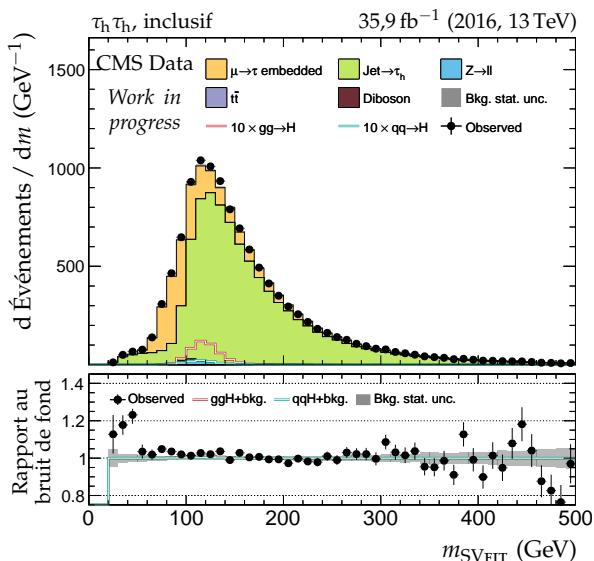

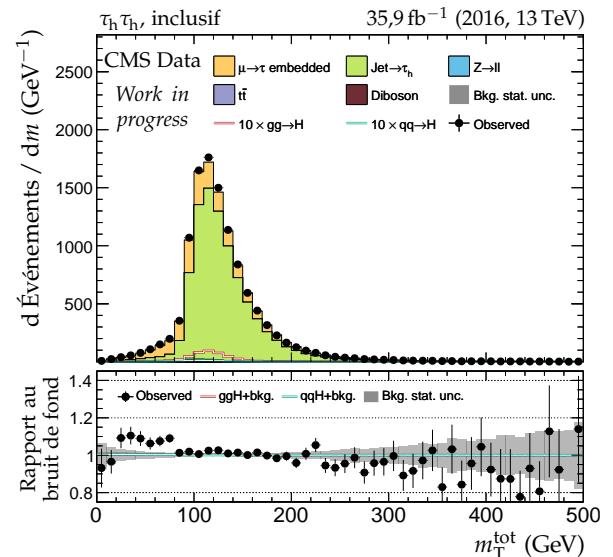

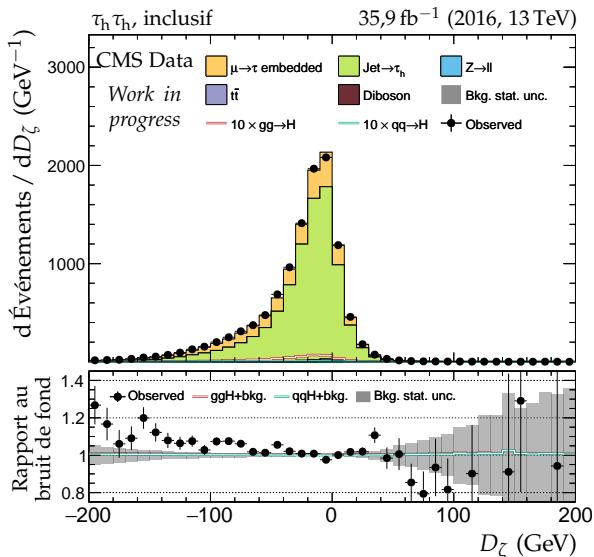

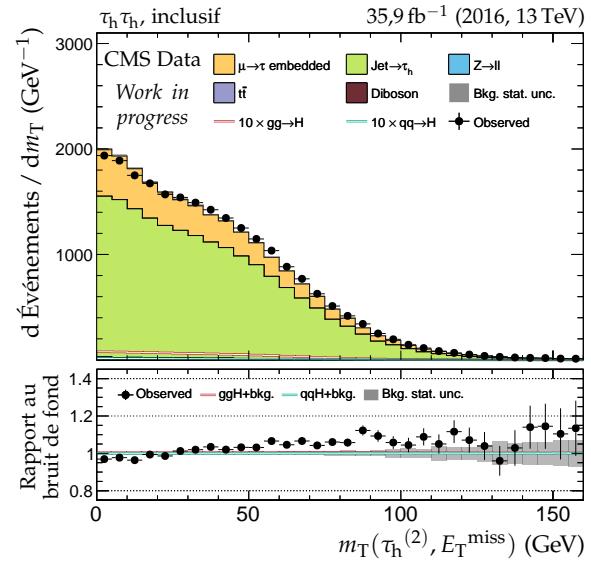

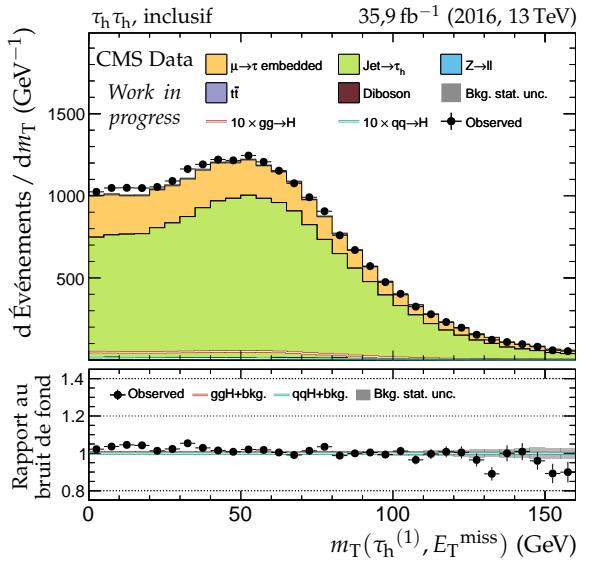

Figure X.6 – Canal $\tau_h \tau_h$, 2016 : masses transverses, D_ζ et masses.

8 ANNEXE X. DISTRIBUTIONS DE CONTRÔLE – $H \rightarrow \tau\tau$

(a) Impulsion transverse du jet principal.

(b) Impulsion transverse du jet secondaire.

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

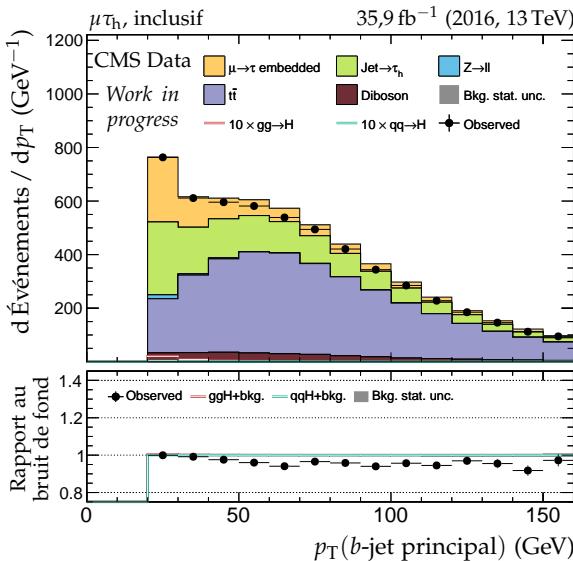

(e) Angle azimutal du jet principal.

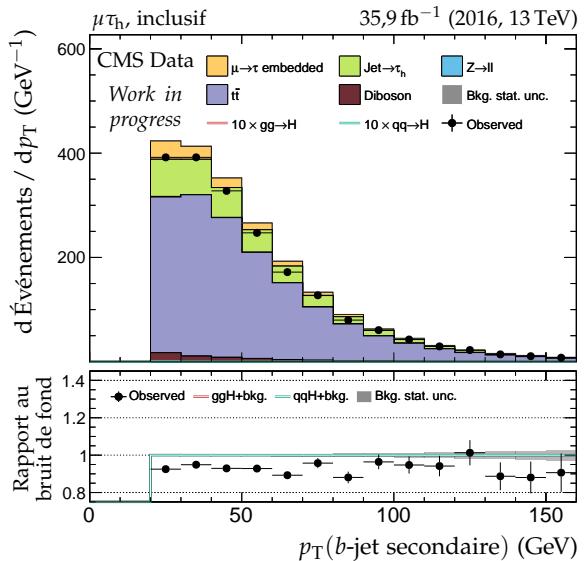

(f) Angle azimutal du jet secondaire.

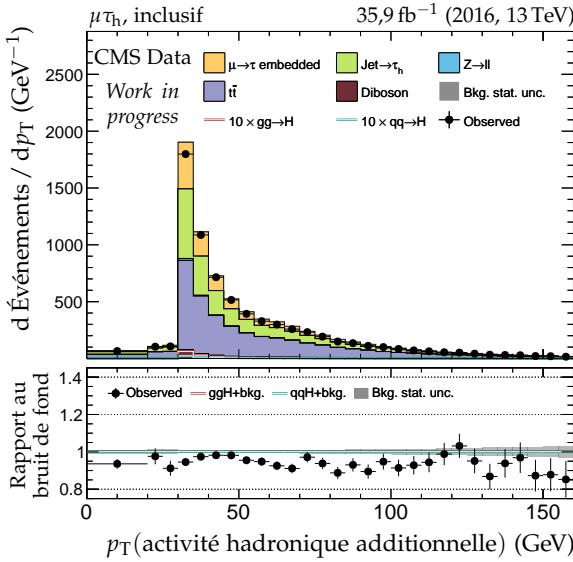

Figure X.7 – Canal $\mu\tau_h$, 2016 : cinématique des deux jets principaux.

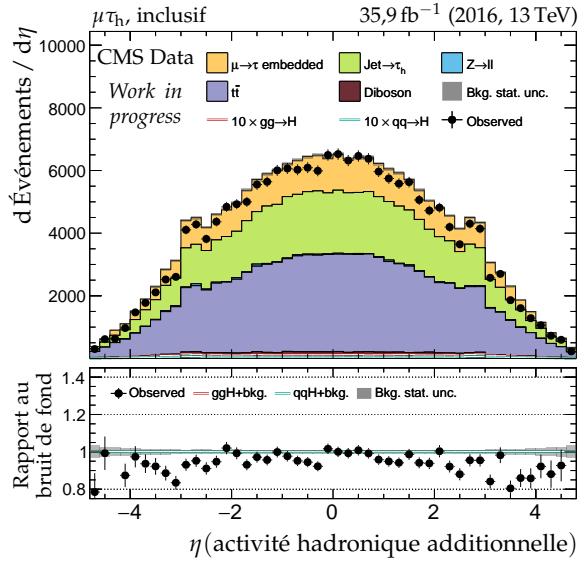

(a) Impulsion transverse du b-jet principal.

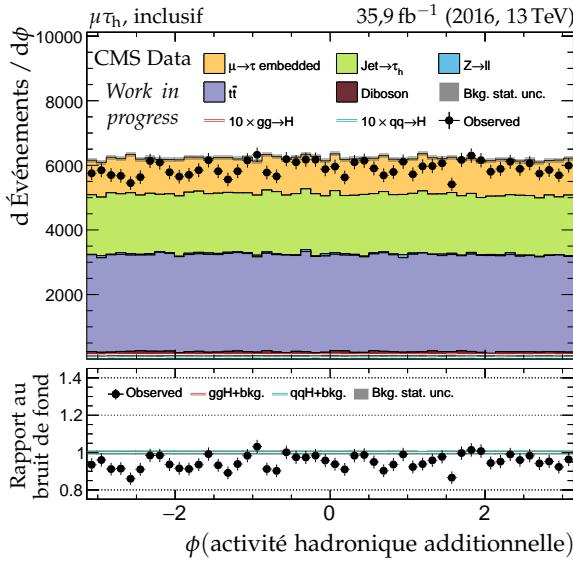

(b) Impulsion transverse du b-jet secondaire.

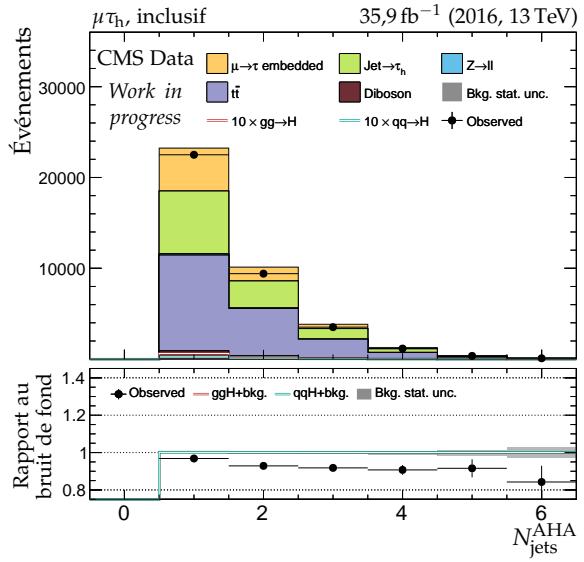

(c) Impulsion transverse de l'AHA.

(d) Pseudo-rapidité de l'AHA.

(e) Angle azimutal de l'AHA.

(f) Nombre de jets dans l'AHA.

Figure X.8 – Canal $\mu\tau_h$, 2016 : b-jets et activité hadronique additionnelle.

10 ANNEXE X. DISTRIBUTIONS DE CONTRÔLE – $H \rightarrow \tau\tau$

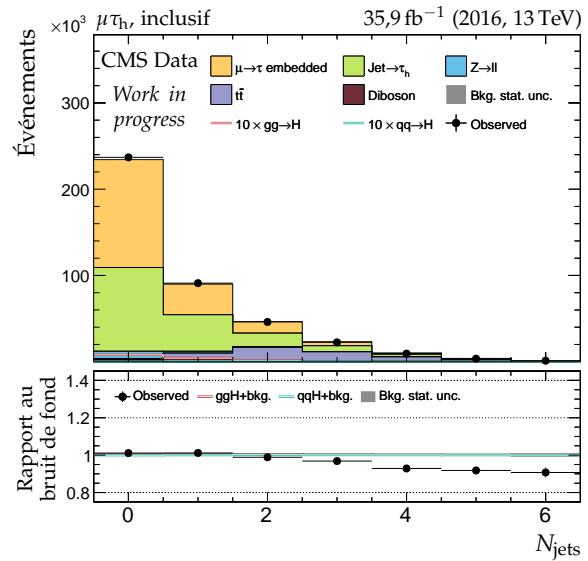

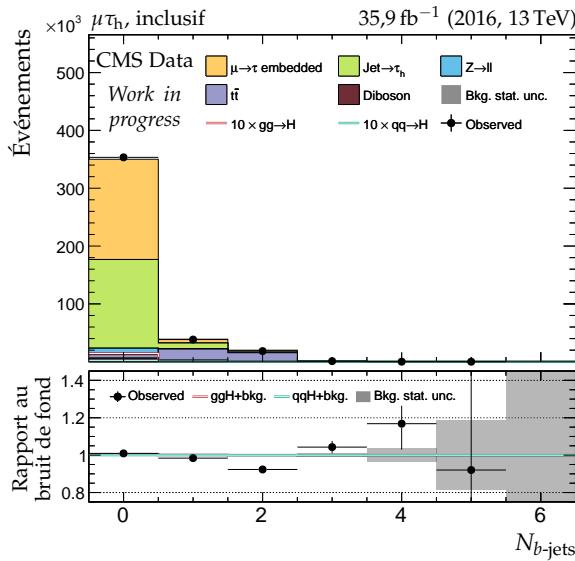

Figure X.9 – Canal $\mu\tau_h$, 2016 : nombre de jets, système des deux jets principaux et empilement.

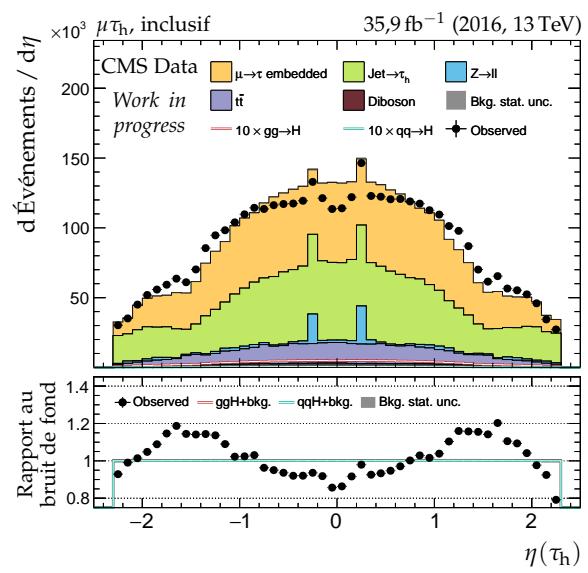

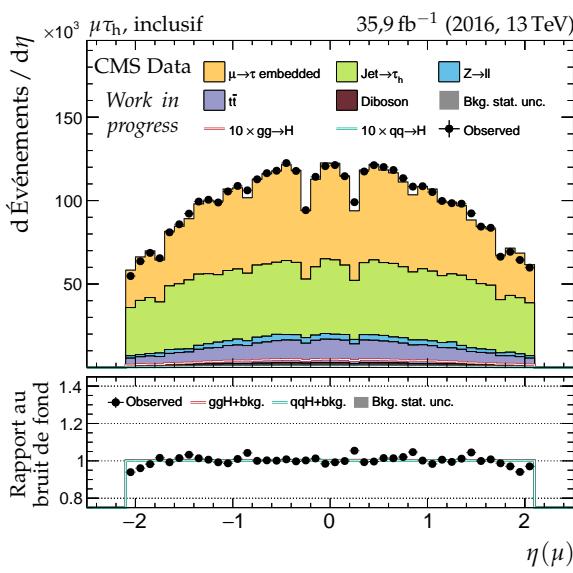

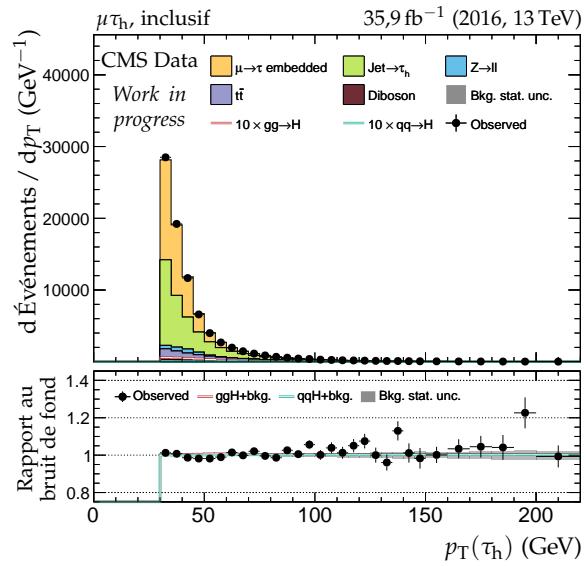

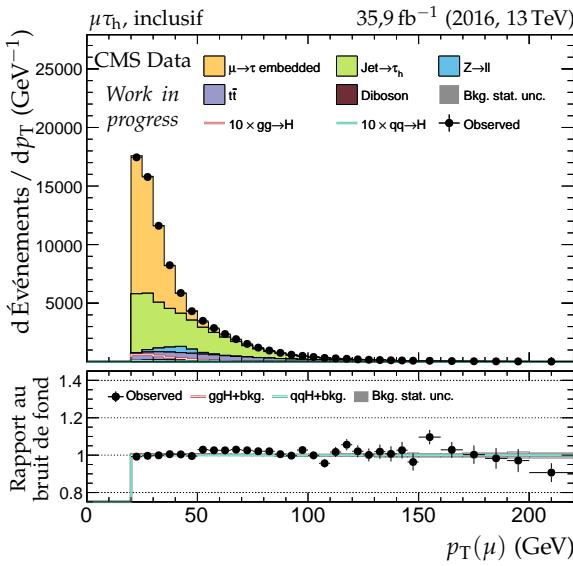

Figure X.10 – Canal $\mu\tau_h$, 2016 : cinématique des leptons (μ, τ_h).

(a) Énergie transverse manquante.

(b) Masse transverse du dilepton.

(c) Impulsion transverse du dilepton.

(d) Masse visible du dilepton.

 (e) Impulsion transverse du système di- τ .

 (f) Distance ΔR entre les leptons (μ, τ_h).

 Figure X.11 – Canal $\mu\tau_h$, 2016 : dilepton et énergie transverse manquante.

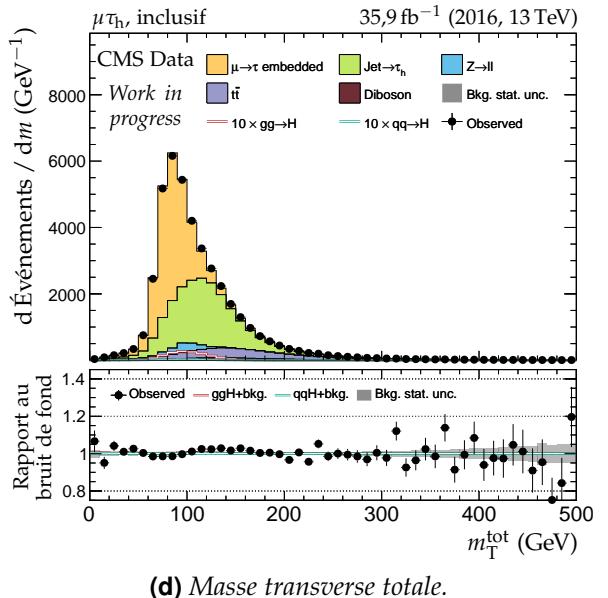

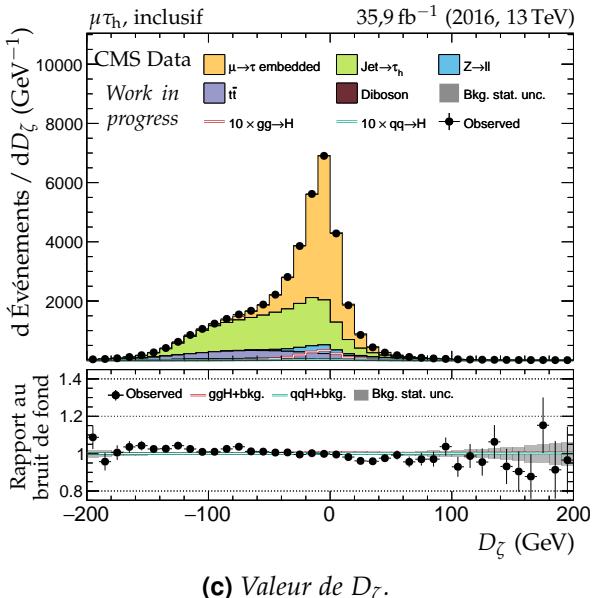

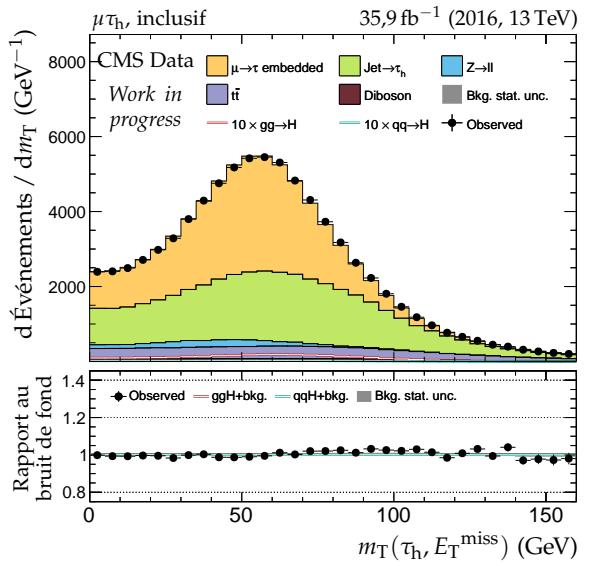

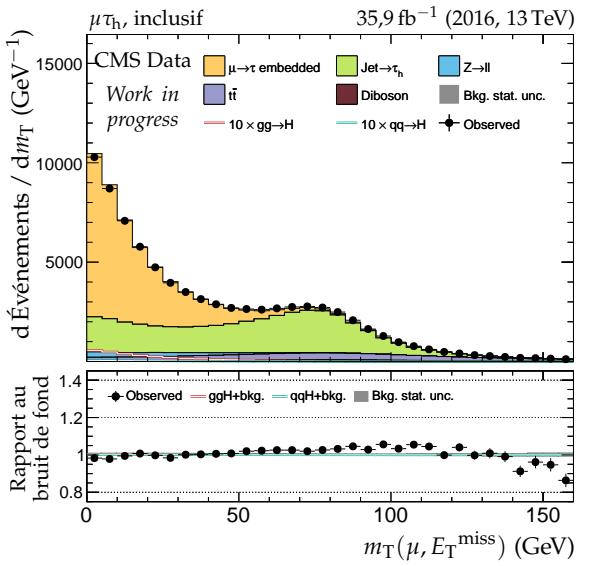

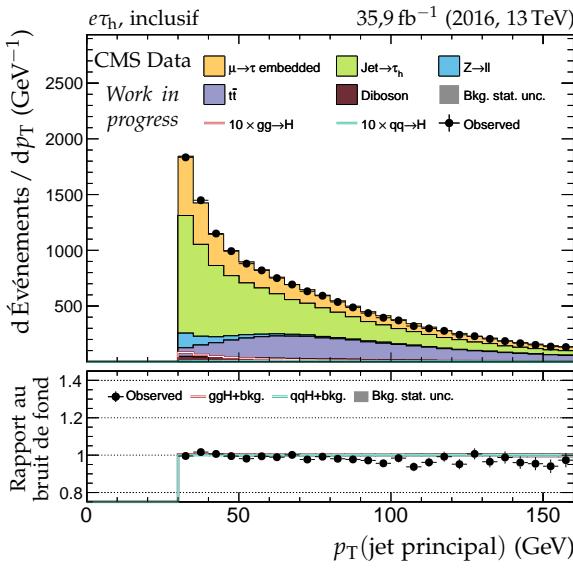

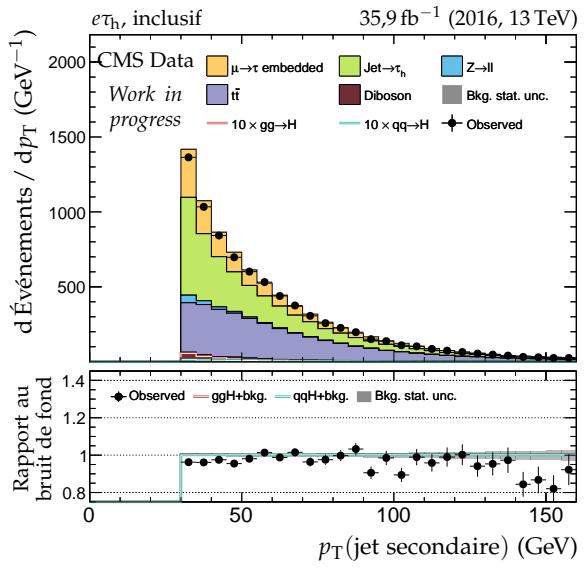

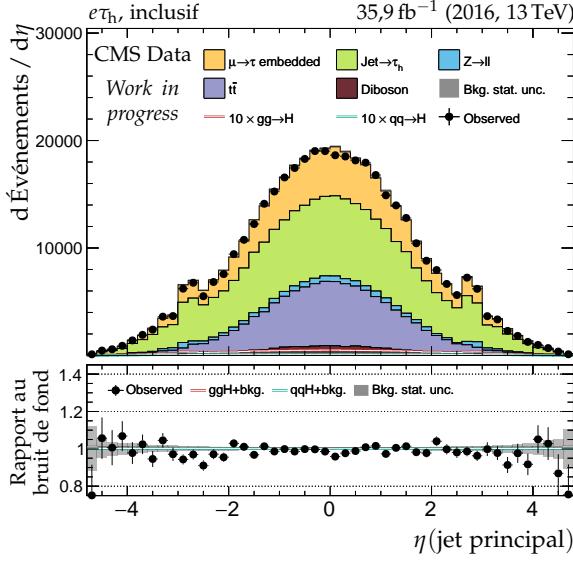

Figure X.12 – Canal $\mu\tau_h$, 2016 : masses transverses, D_ζ et masses.

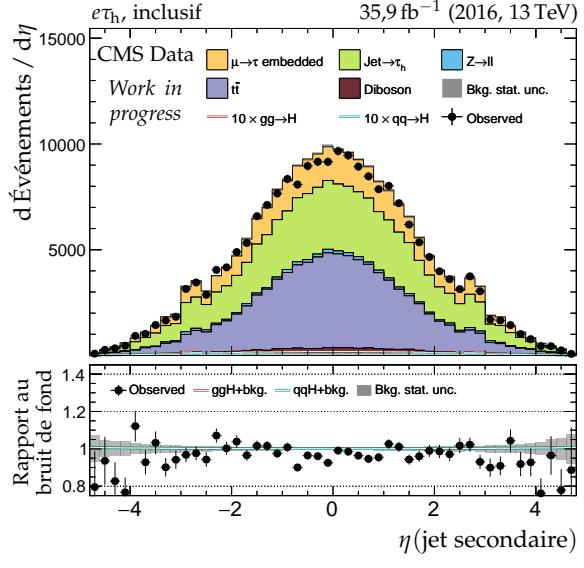

(a) Impulsion transverse du jet principal.

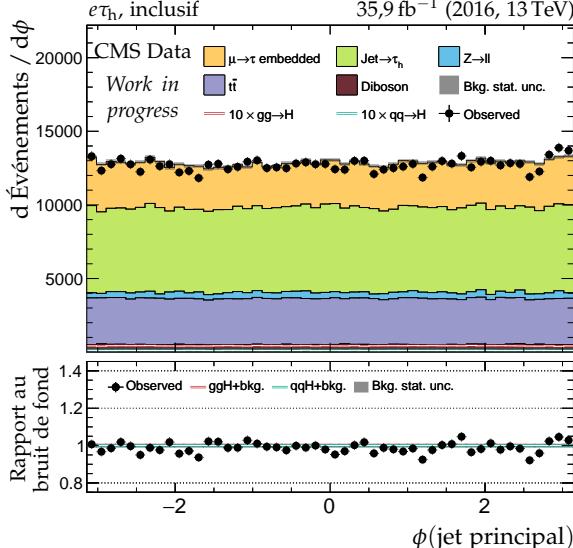

(b) Impulsion transverse du jet secondaire.

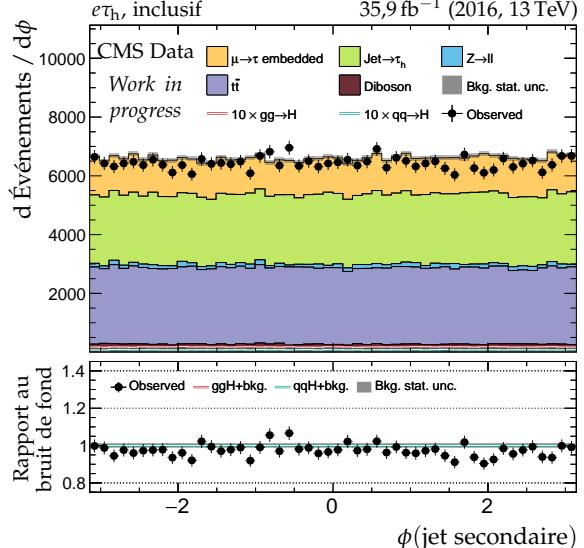

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

(e) Angle azimutal du jet principal.

(f) Angle azimutal du jet secondaire.

Figure X.13 – Canal $e\tau_h$, 2016 : cinématique des deux jets principaux.

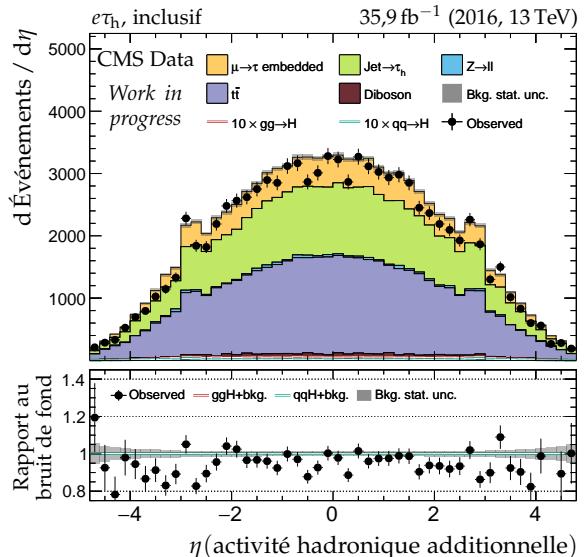

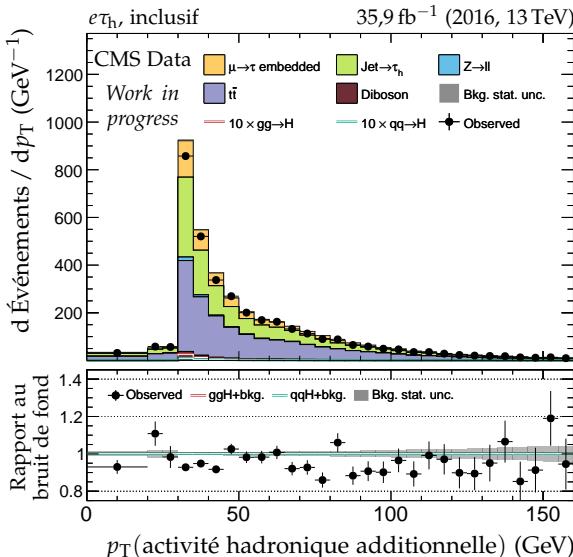

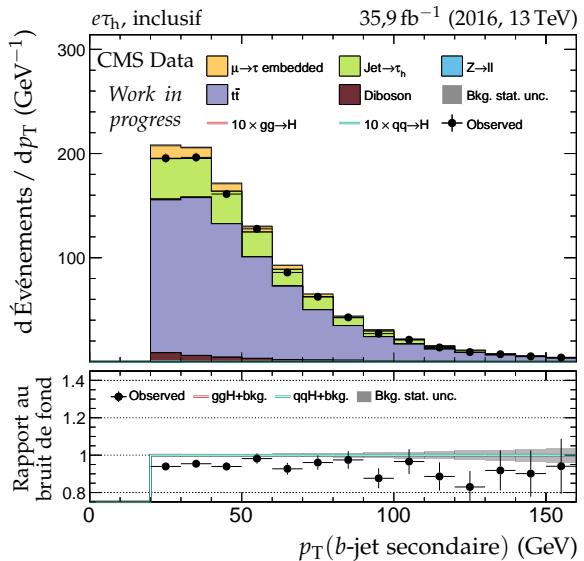

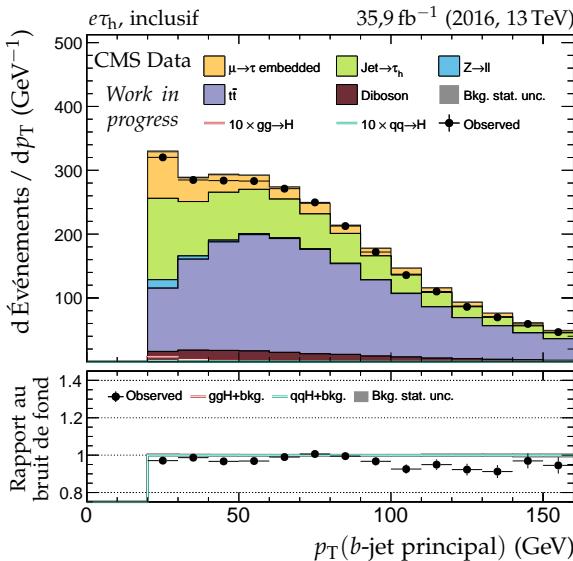

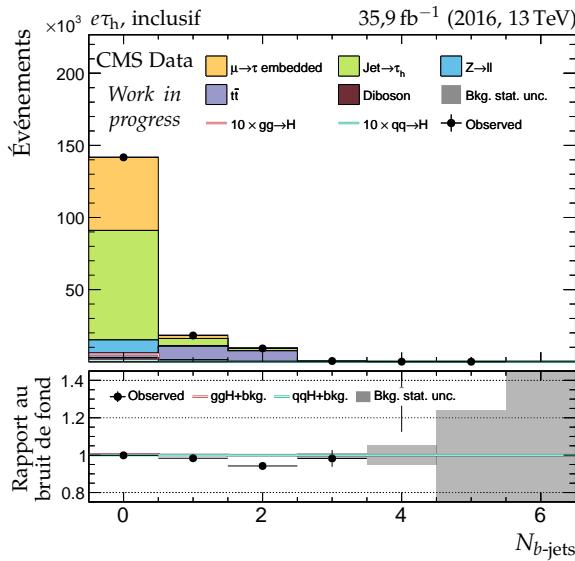

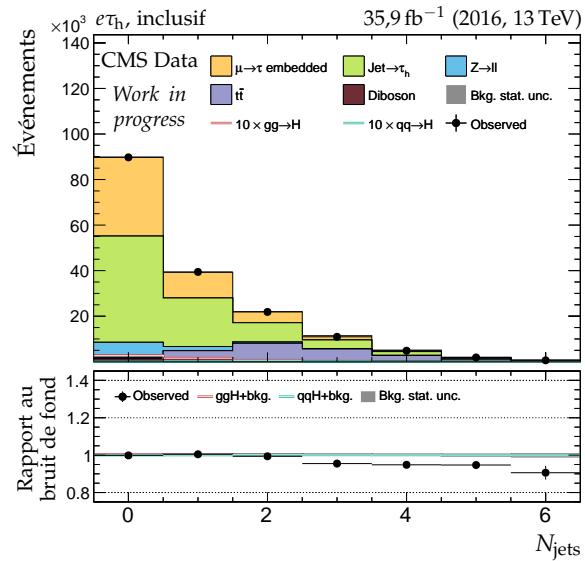

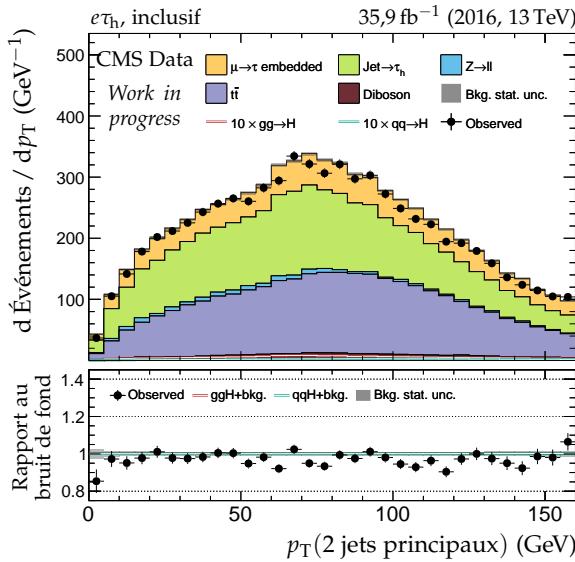

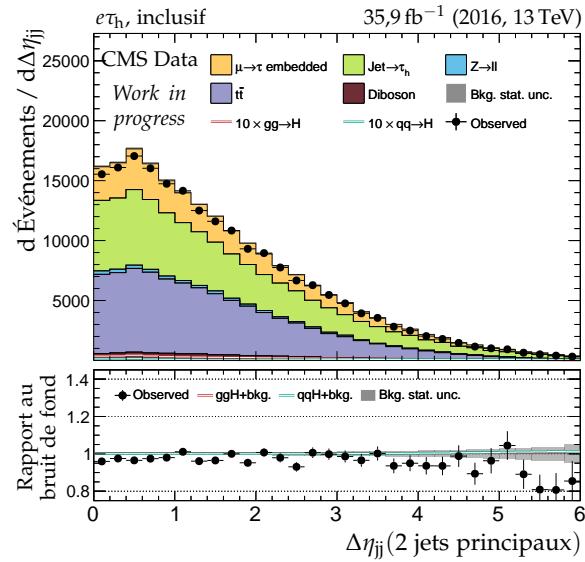

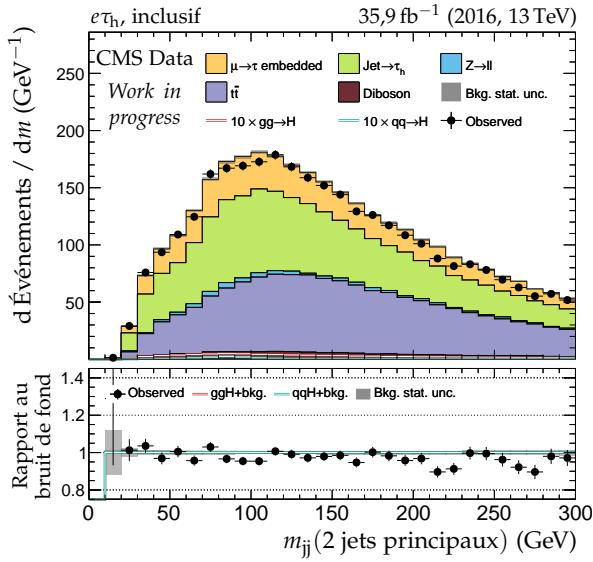

Figure X.14 – Canal $e\tau_h$, 2016 : b-jets et activité hadronique additionnelle.

 (a) Nombre de b -jets.

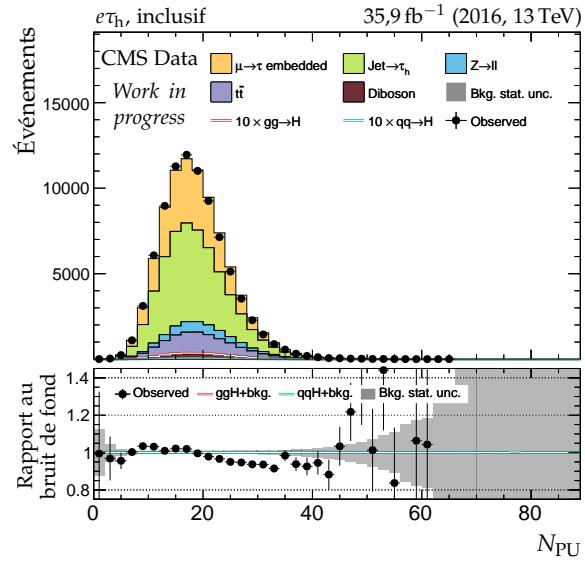

(b) Nombre de jets.

(c) Impulsion transverse du système des deux jets.

 (d) Distance en η entre les deux jets.

(e) Masse invariante du système des deux jets.

(f) Nombre de vertex d'empilement.

 Figure X.15 – Canal $e\tau_h$, 2016 : nombre de jets, système des deux jets principaux et empilement.

Figure X.16 – Canal $e\tau_h$, 2016 : cinématique des leptons (e, τ_h).

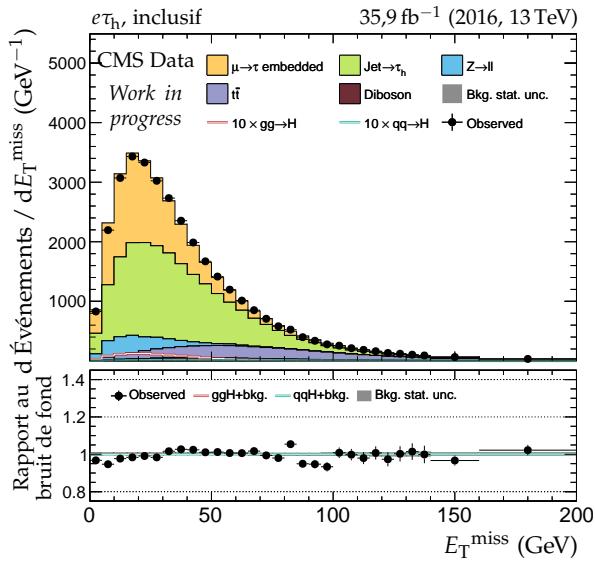

Figure X.17 – Canal $e\tau_h$, 2016 : dilepton et énergie transverse manquante.

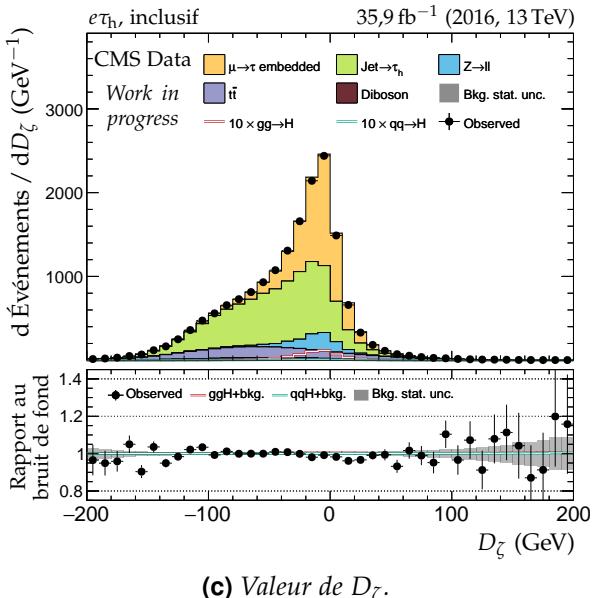

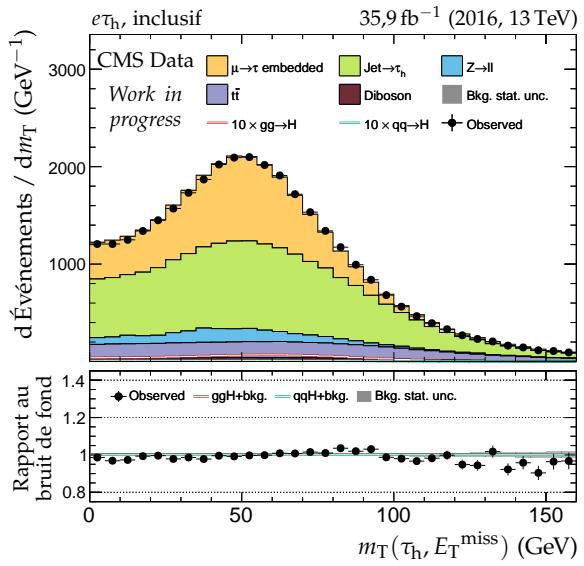

Figure X.18 – Canal $e\tau_h$, 2016 : masses transverses, D_ζ et masses.

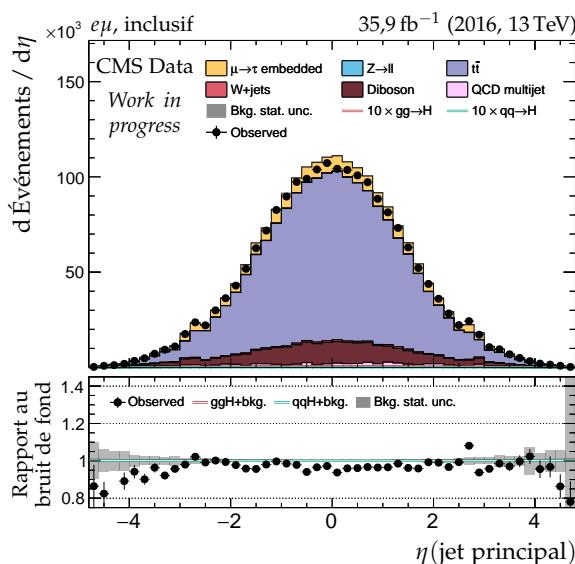

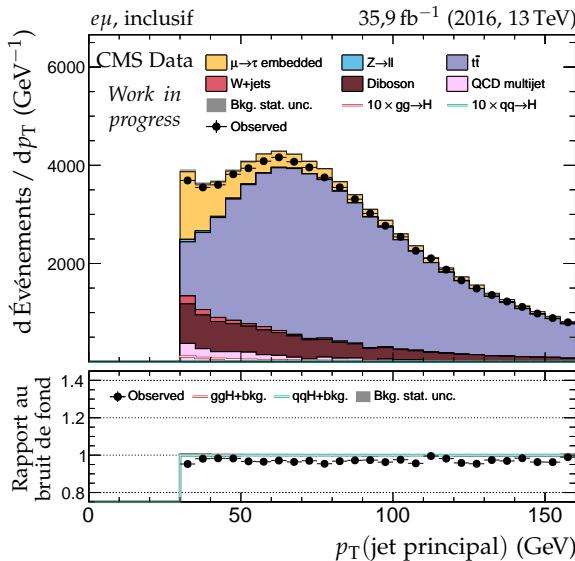

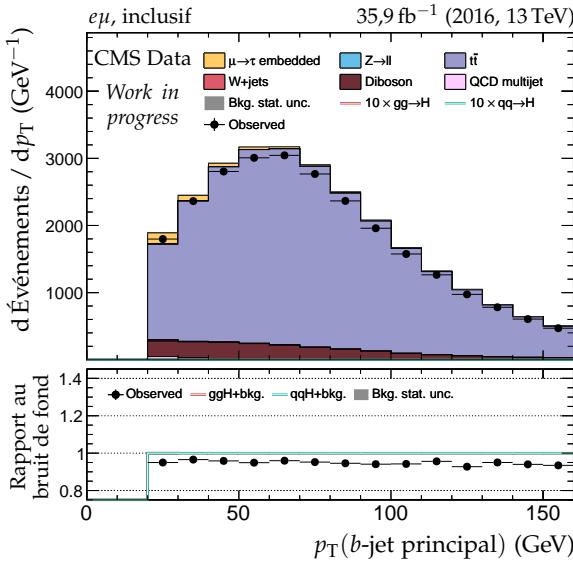

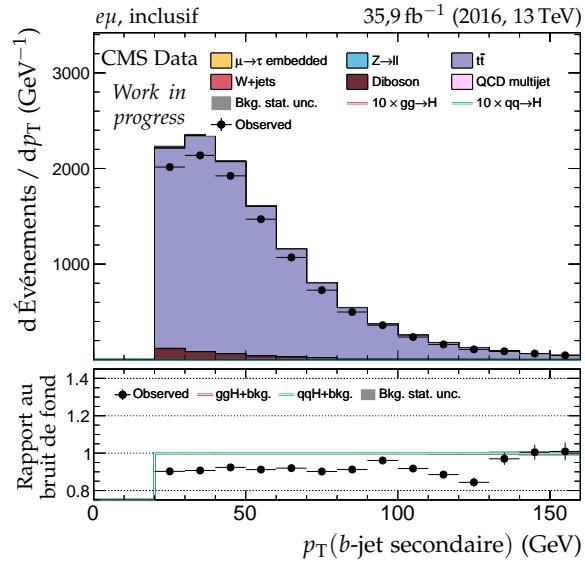

Figure X.19 – Canal $e\mu$, 2016 : cinématique des deux jets principaux.

(a) Impulsion transverse du b-jet principal.

(b) Impulsion transverse du b-jet secondaire.

(c) Impulsion transverse de l'AHA.

(d) Pseudo-rapidité de l'AHA.

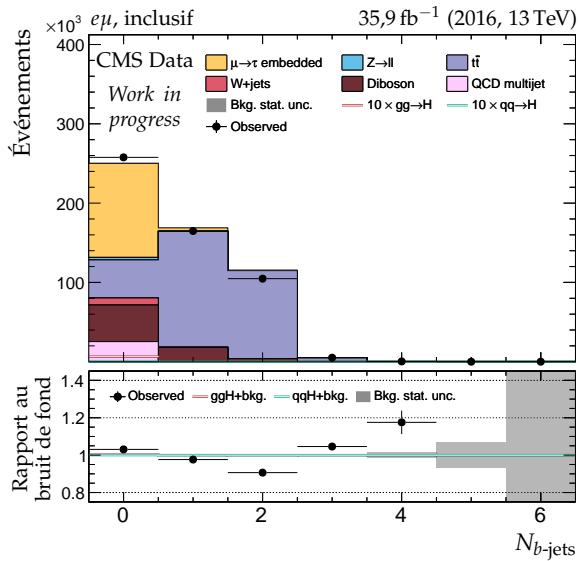

(e) Angle azimutal de l'AHA.

(f) Nombre de jets dans l'AHA.

Figure X.20 – Canal $e\mu$, 2016 : b-jets et activité hadronique additionnelle.

 (a) Nombre de b -jets.

(b) Nombre de jets.

(c) Impulsion transverse du système des deux jets.

 (d) Distance en η entre les deux jets.

(e) Masse invariante du système des deux jets.

(f) Nombre de vertex d'empilement.

 Figure X.21 – Canal $e\mu$, 2016 : nombre de jets, système des deux jets principaux et empilement.

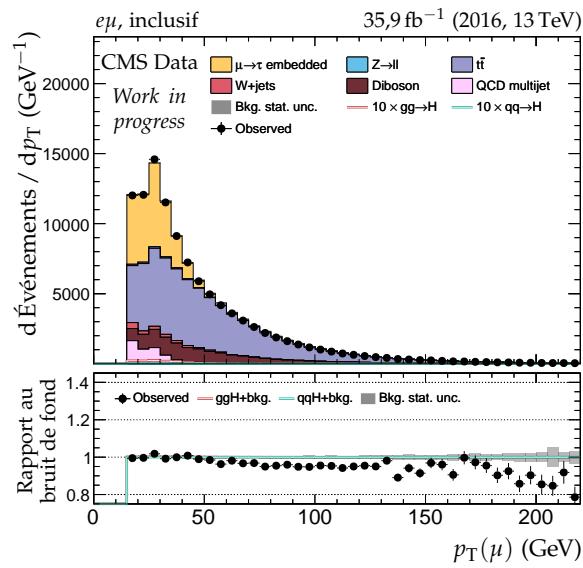

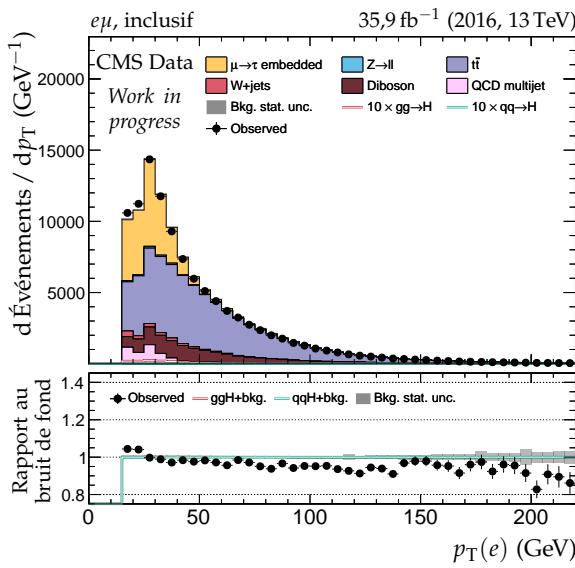

Figure X.22 – Canal $e\mu$, 2016 : cinématique des leptons (e, μ).

Figure X.23 – Canal $e\mu$, 2016 : dilepton et énergie transverse manquante.

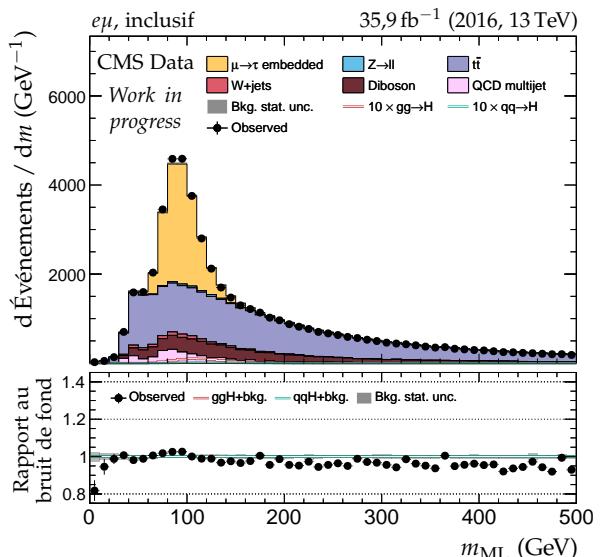

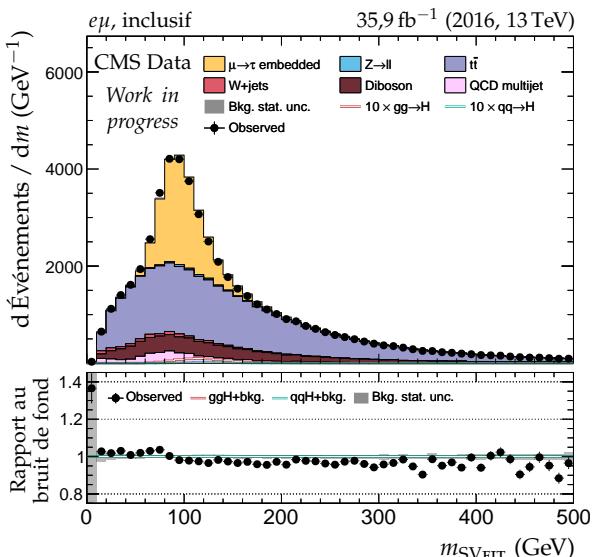

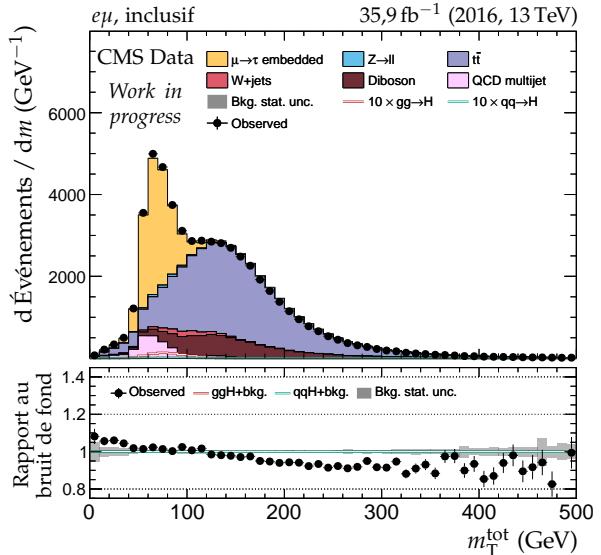

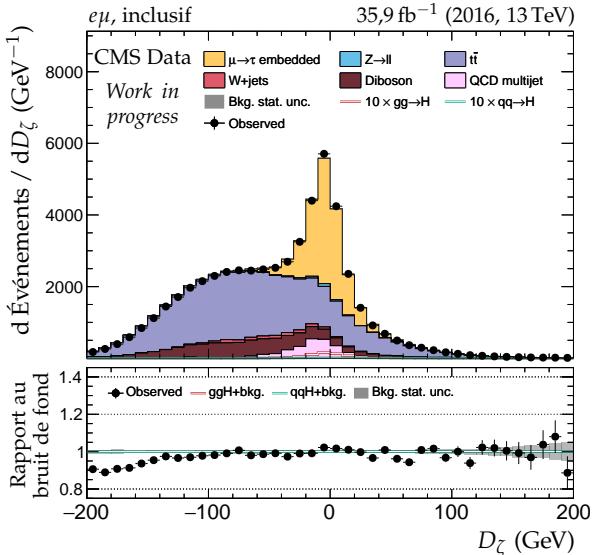

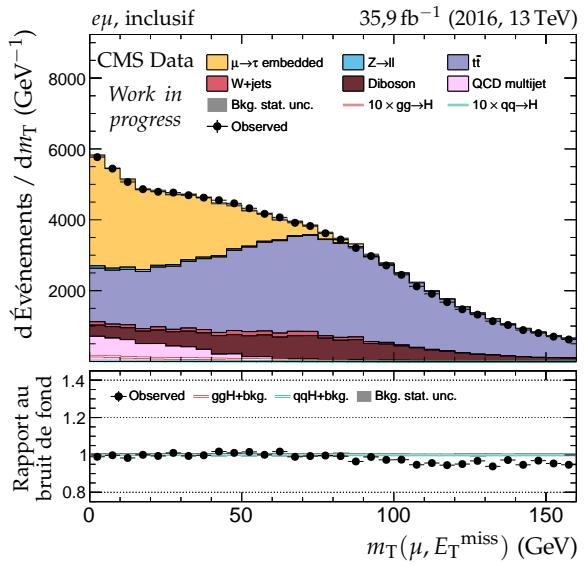

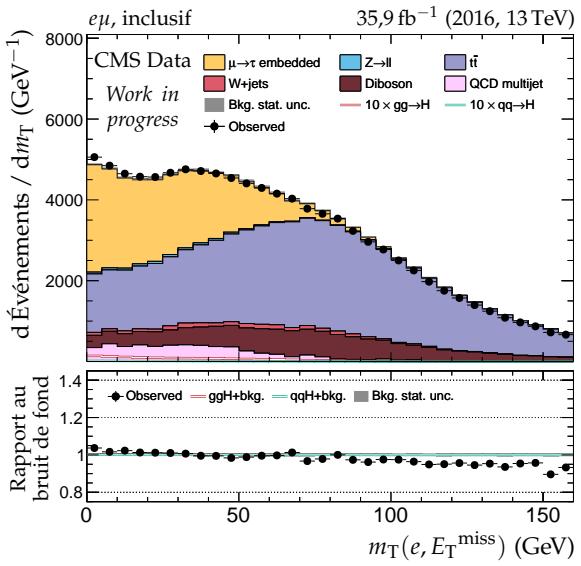

Figure X.24 – Canal $e\mu$, 2016 : masses transverses, D_ζ et masses.

(a) Impulsion transverse du jet principal.

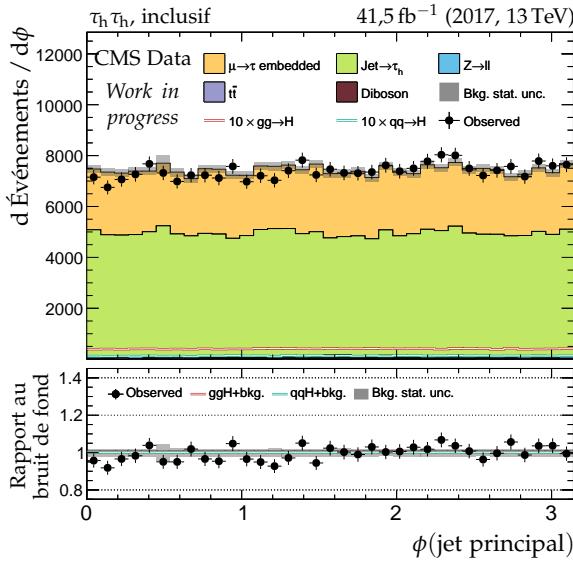

(b) Impulsion transverse du jet secondaire.

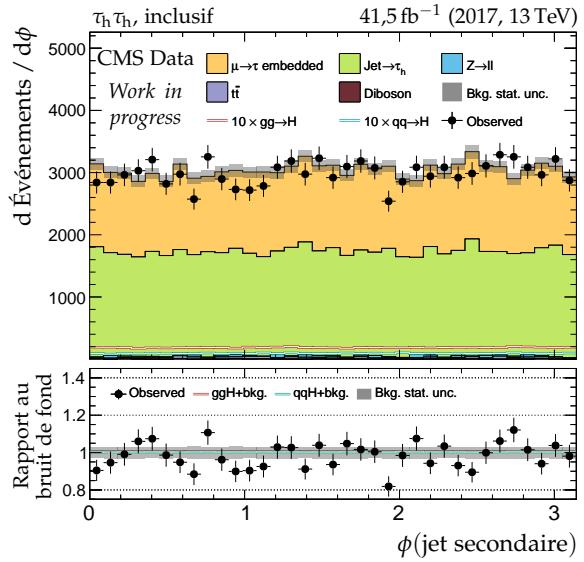

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

(e) Angle azimutal du jet principal.

(f) Angle azimutal du jet secondaire.

Figure X.25 – Canal $\tau_h \tau_h$, 2017 : cinématique des deux jets principaux.

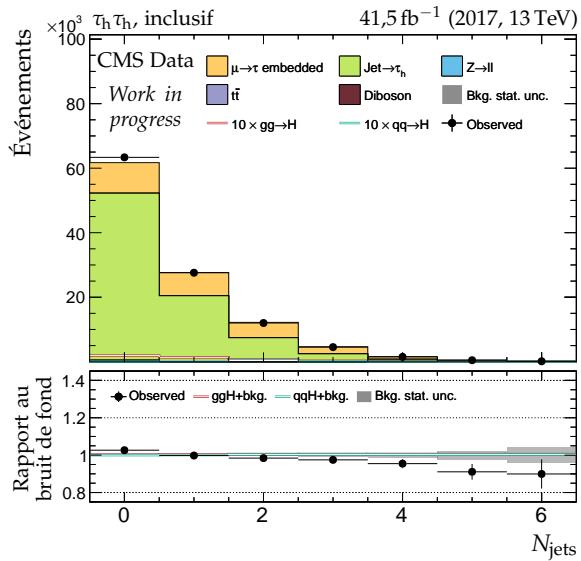

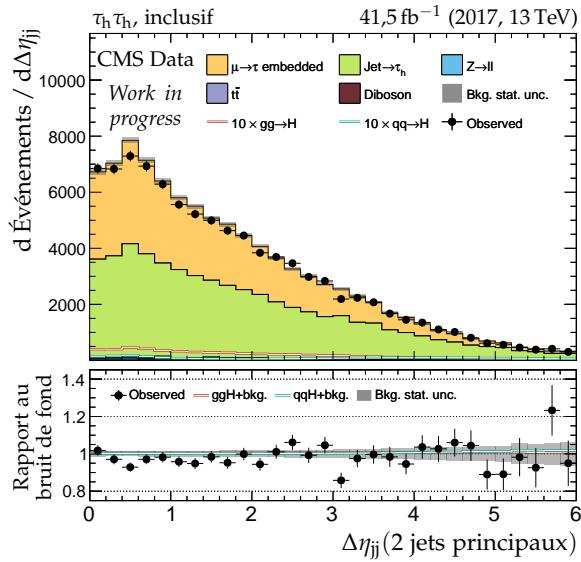

Figure X.26 – Canal $\tau_h \tau_h$, 2017 : b-jets et activité hadronique additionnelle.

 (a) Nombre de b -jets.

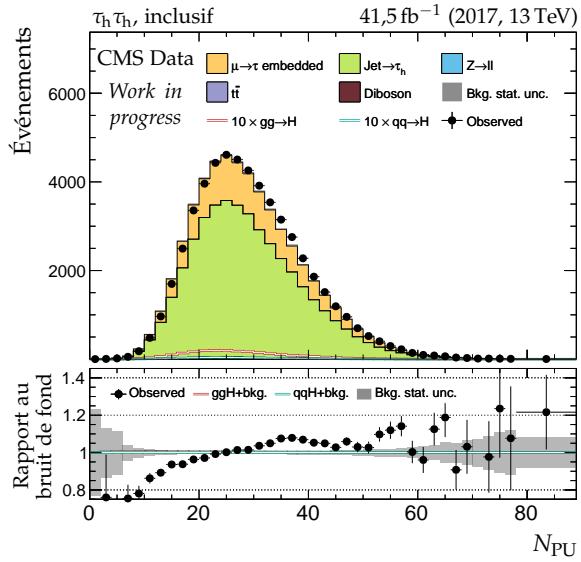

(b) Nombre de jets.

(c) Impulsion transverse du système des deux jets.

 (d) Distance en η entre les deux jets.

(e) Masse invariante du système des deux jets.

(f) Nombre de vertex d'empilement.

Figure X.27 – Canal $\tau_h\tau_h$, 2017 : nombre de jets, système des deux jets principaux et empilement.

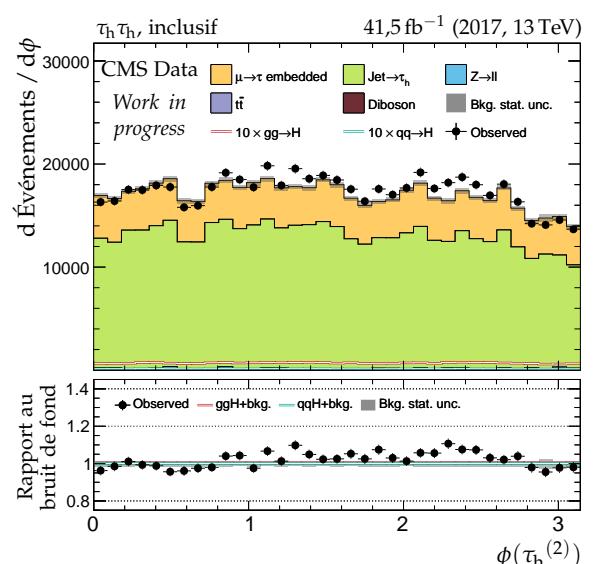

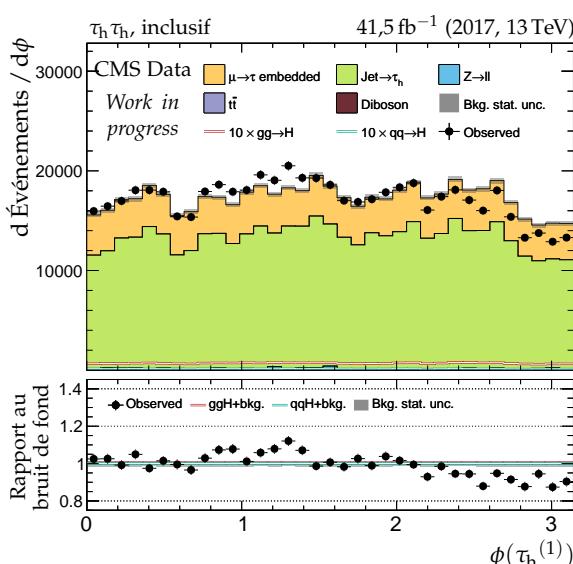

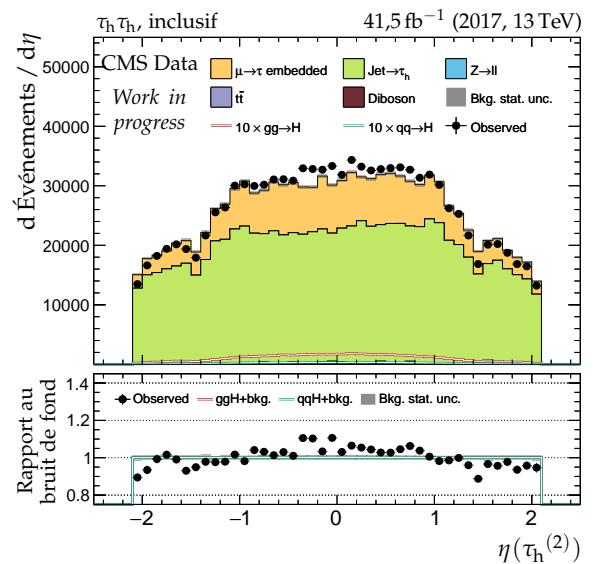

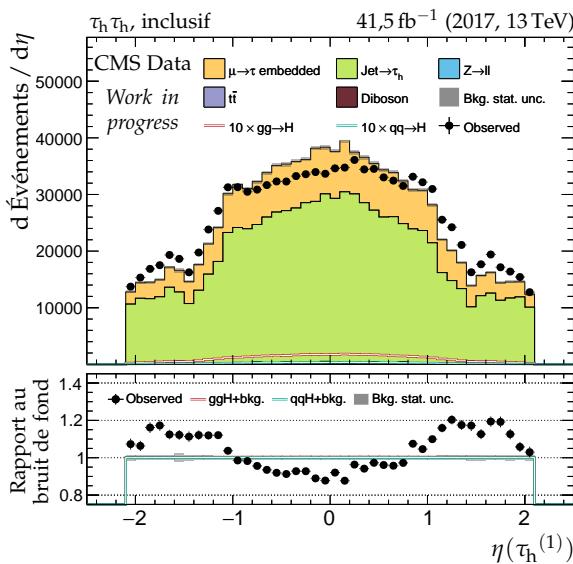

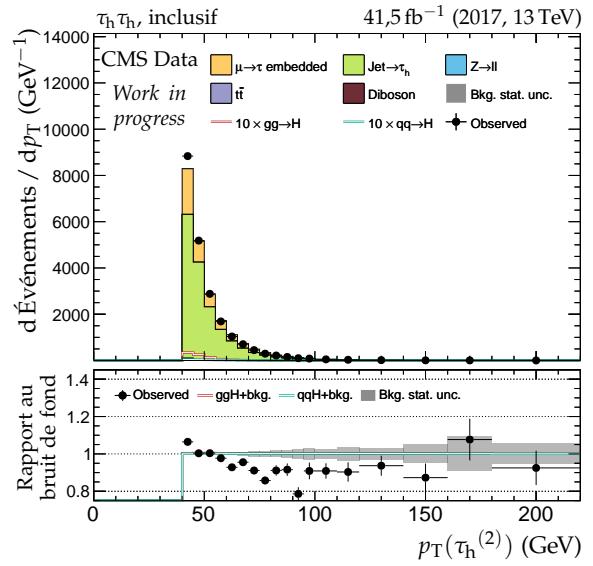

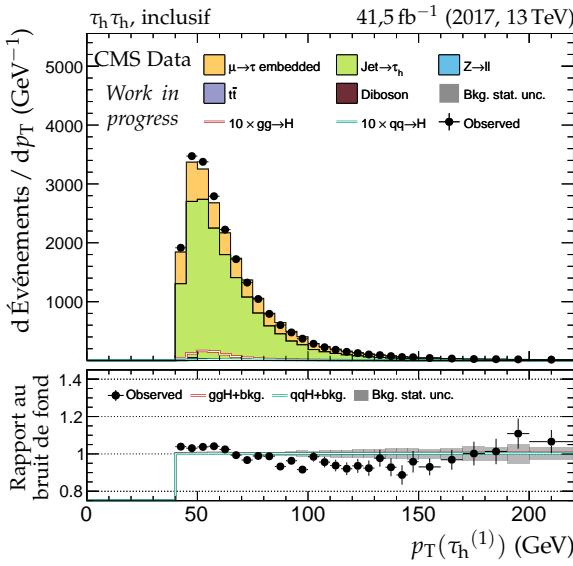

Figure X.28 – Canal $\tau_h \tau_h$, 2017 : cinématique des leptons ($\tau_h^{(1)}, \tau_h^{(2)}$).

(a) Énergie transverse manquante.

(b) Masse transverse du dilepton.

(c) Impulsion transverse du dilepton.

(d) Masse visible du dilepton.

 (e) Impulsion transverse du système di- τ .

 (f) Distance ΔR entre les leptons ($\tau_h^{(1)}, \tau_h^{(2)}$).

 Figure X.29 – Canal $\tau_h \tau_h$, 2017 : dilepton et énergie transverse manquante.

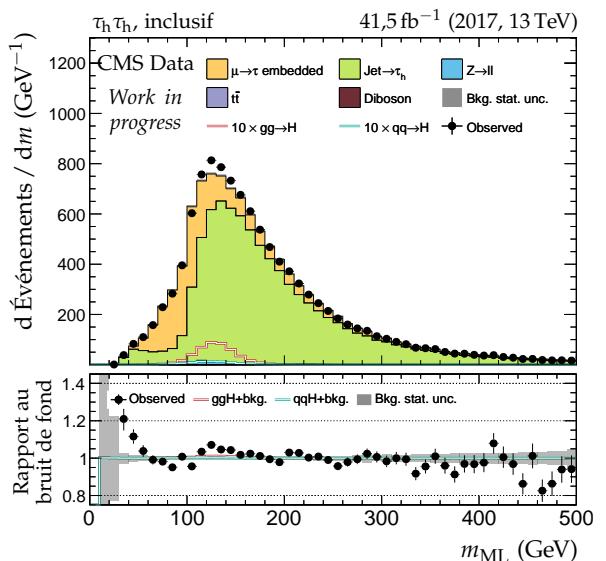

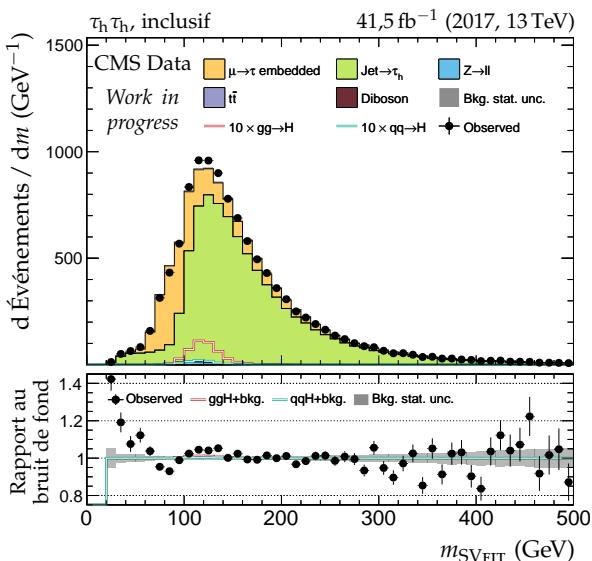

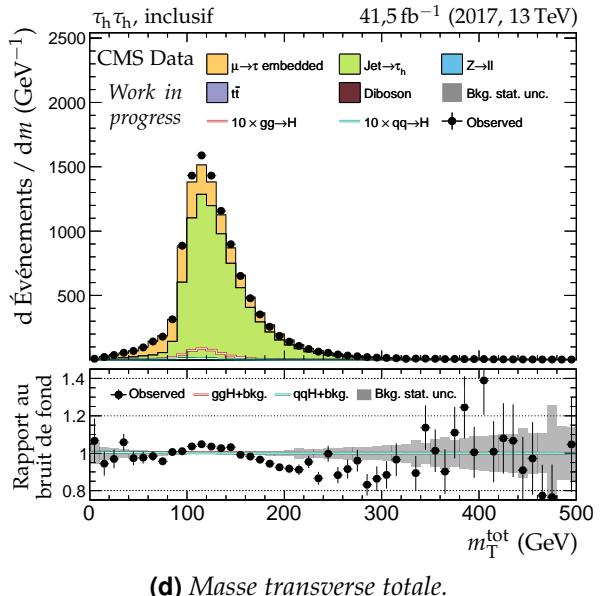

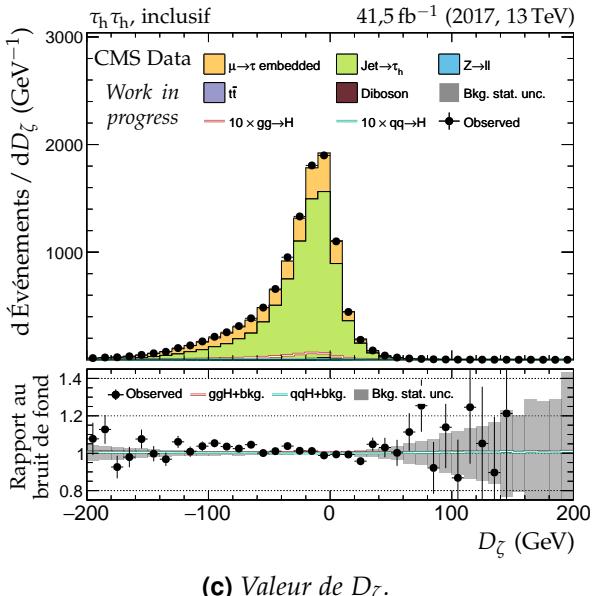

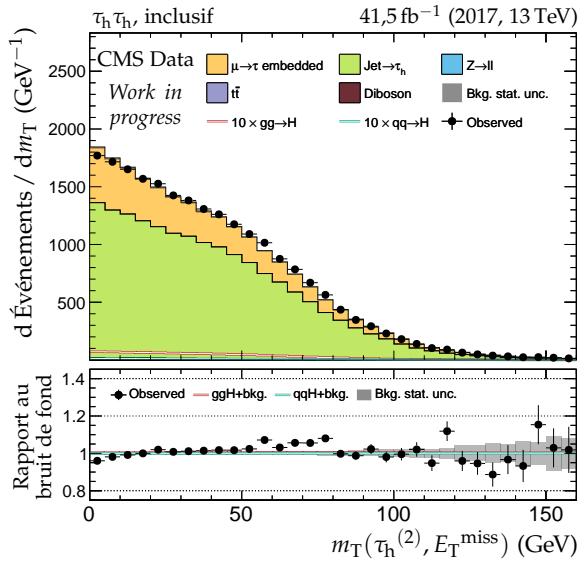

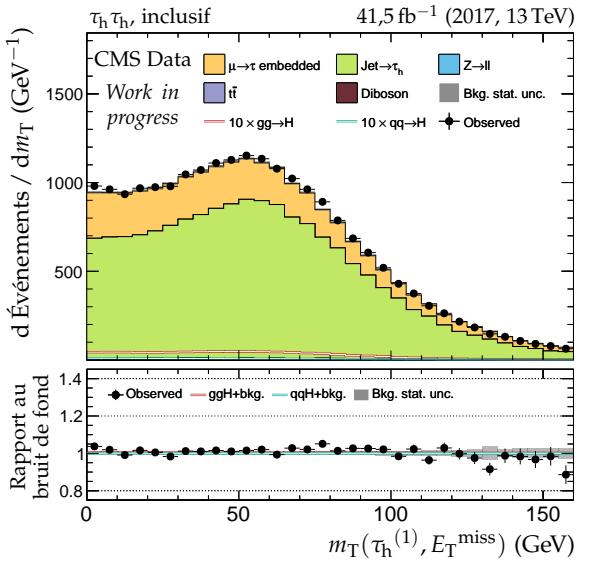

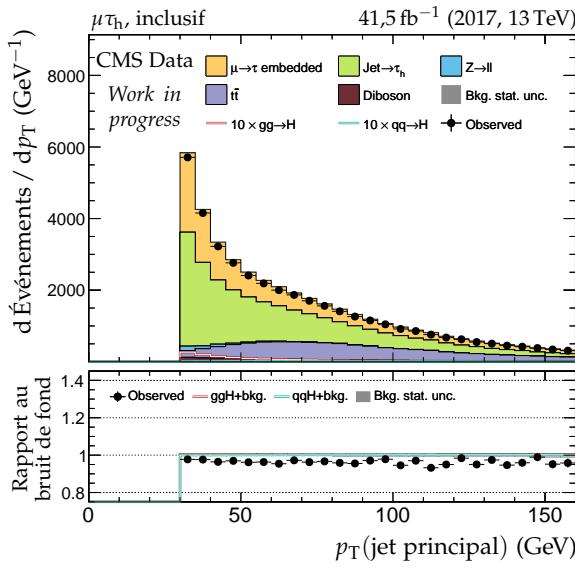

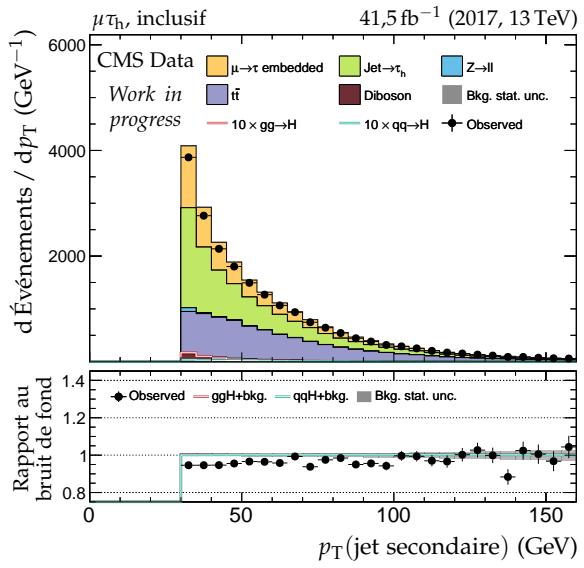

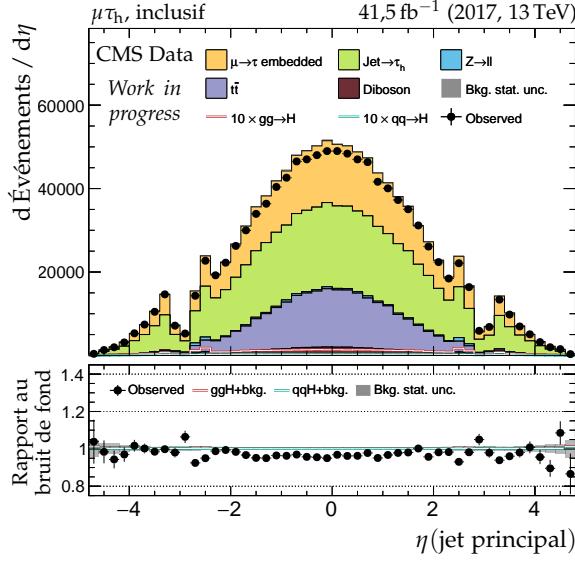

Figure X.30 – Canal $\tau_h \tau_h$, 2017 : masses transverses, D_ζ et masses.

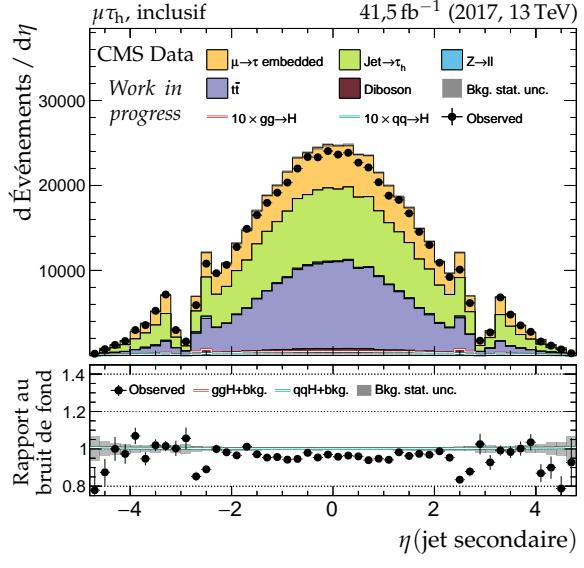

(a) Impulsion transverse du jet principal.

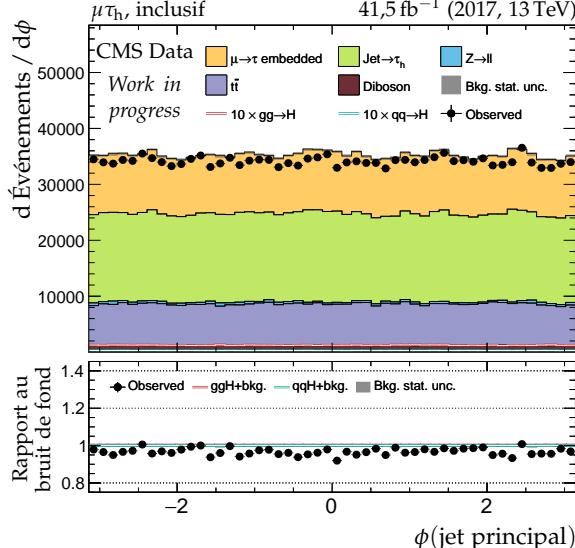

(b) Impulsion transverse du jet secondaire.

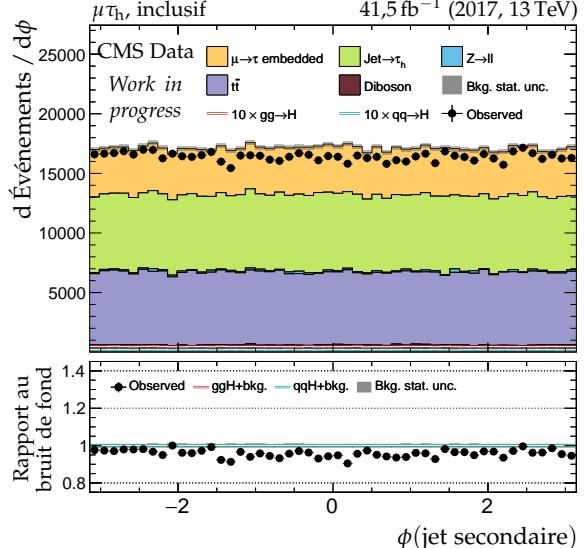

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

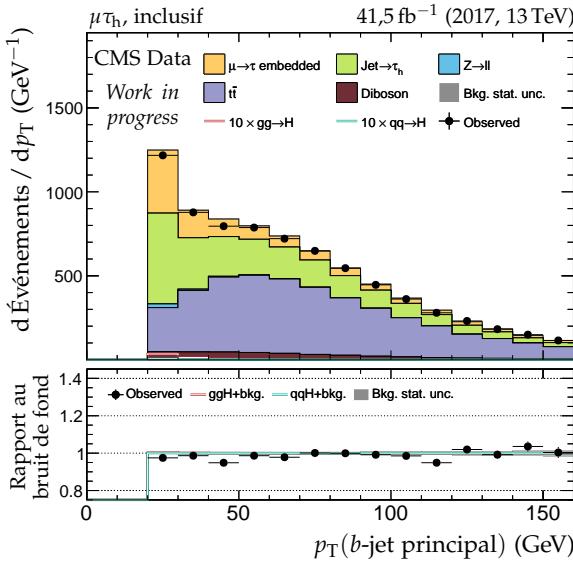

(e) Angle azimutal du jet principal.

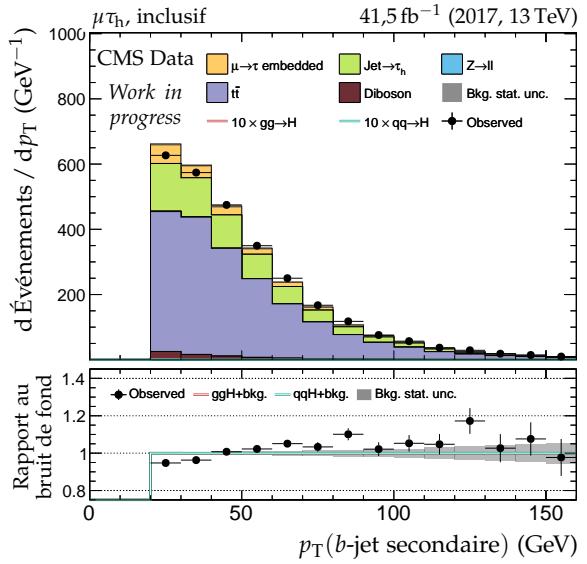

(f) Angle azimutal du jet secondaire.

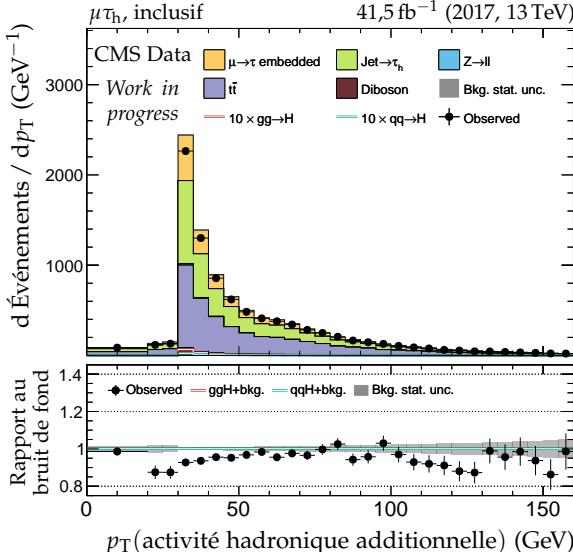

Figure X.31 – Canal $\mu\tau_h$, 2017 : cinématique des deux jets principaux.

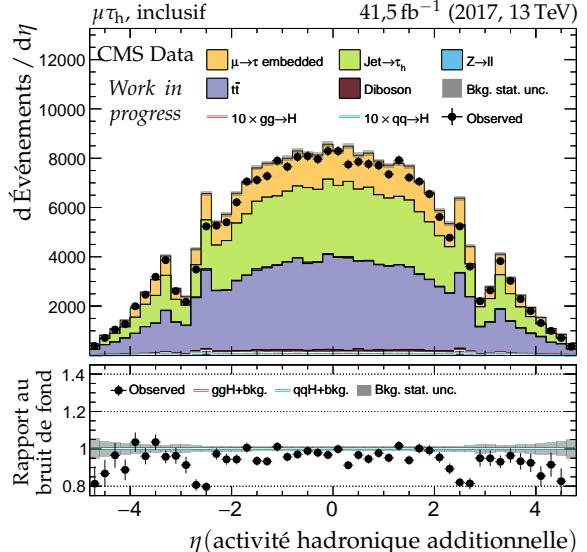

(a) Impulsion transverse du b-jet principal.

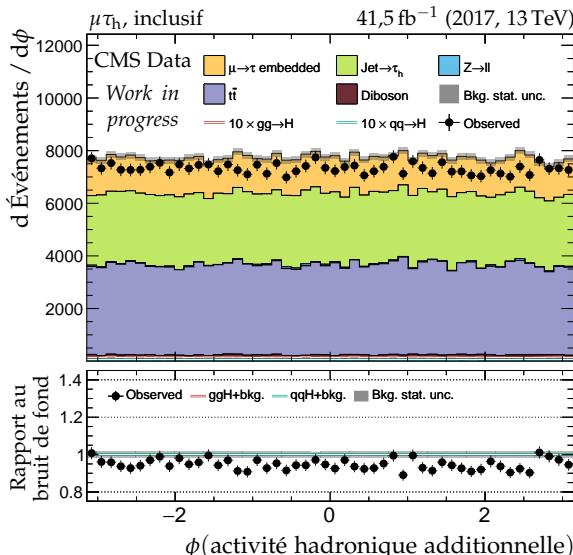

(b) Impulsion transverse du b-jet secondaire.

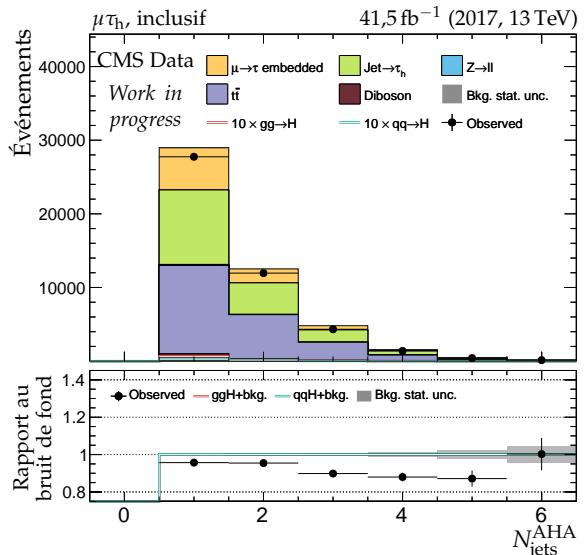

(c) Impulsion transverse de l'AHA.

(d) Pseudo-rapidité de l'AHA.

(e) Angle azimutal de l'AHA.

(f) Nombre de jets dans l'AHA.

Figure X.32 – Canal $\mu\tau_h$, 2017 : b-jets et activité hadronique additionnelle.

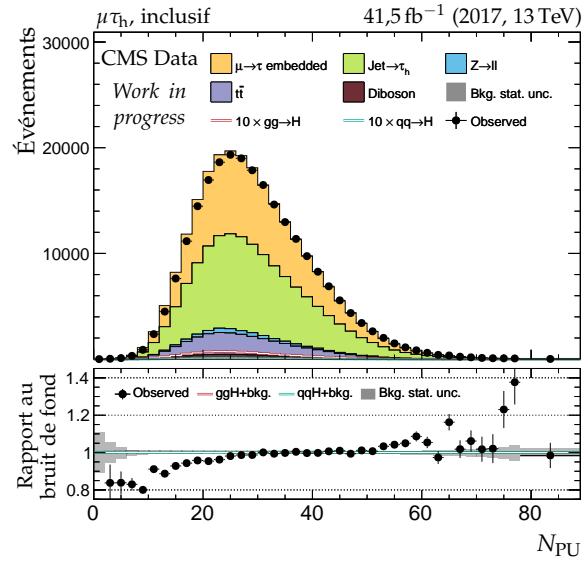

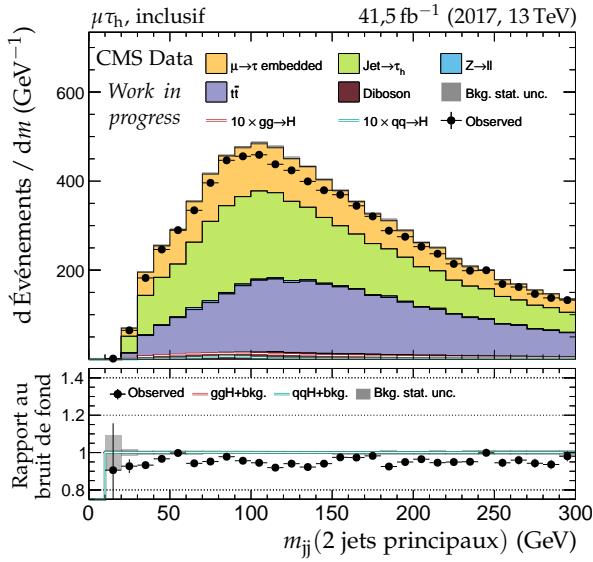

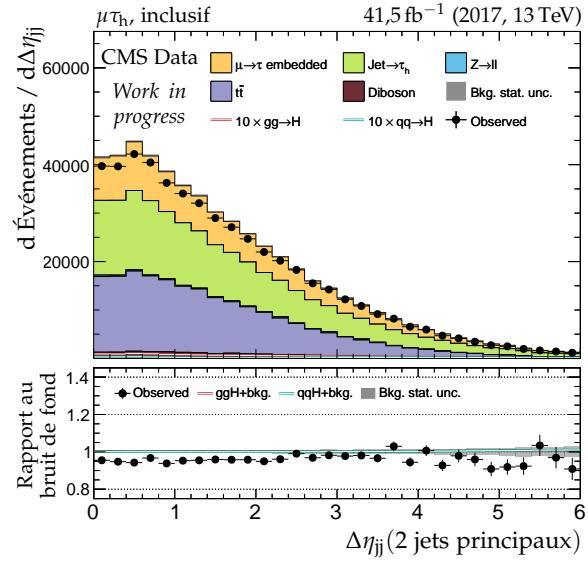

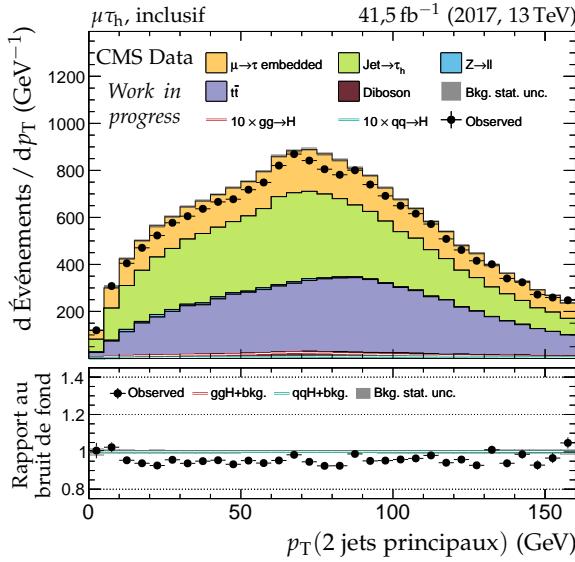

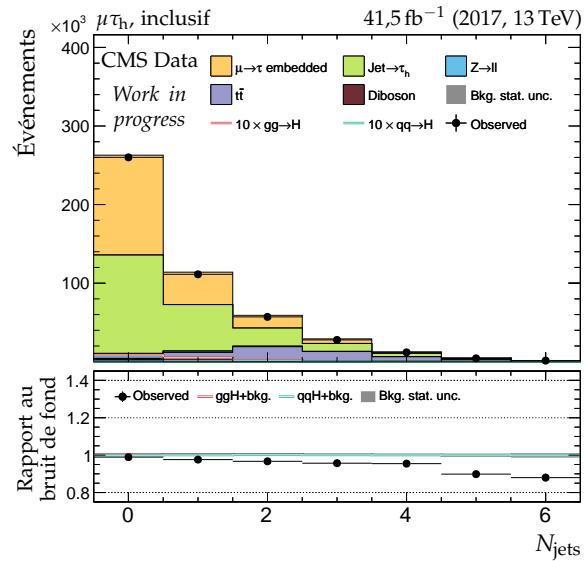

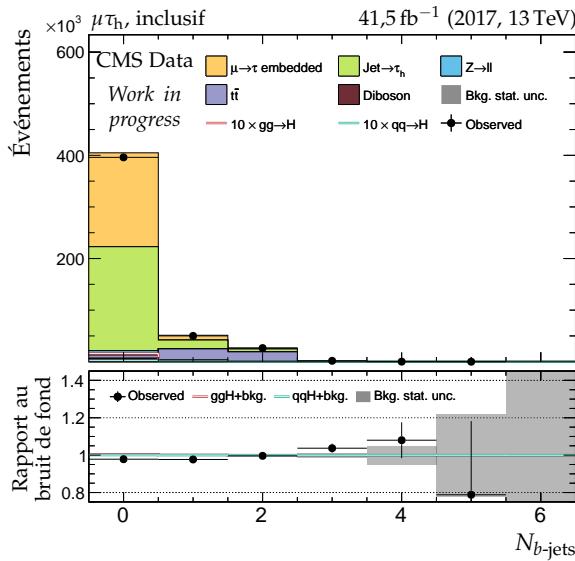

Figure X.33 – Canal $\mu\tau_h$, 2017 : nombre de jets, système des deux jets principaux et empilement.

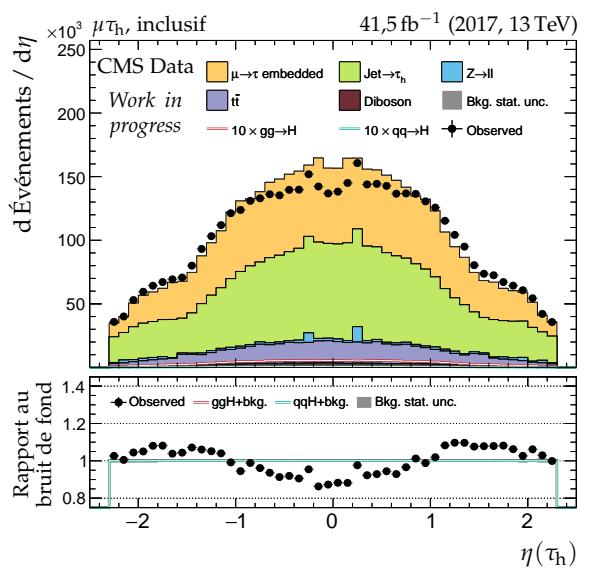

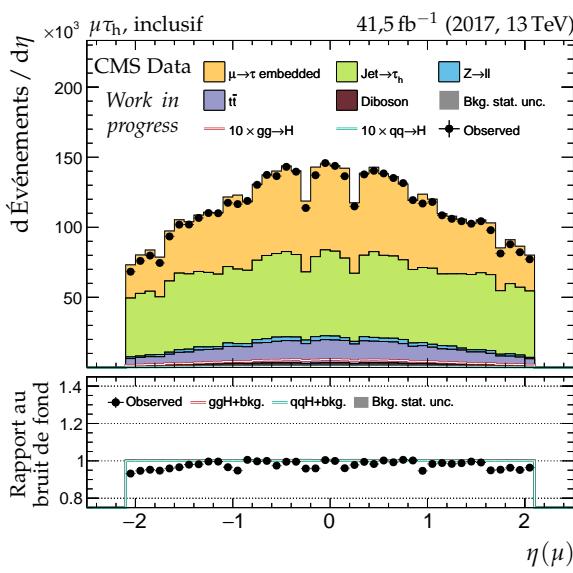

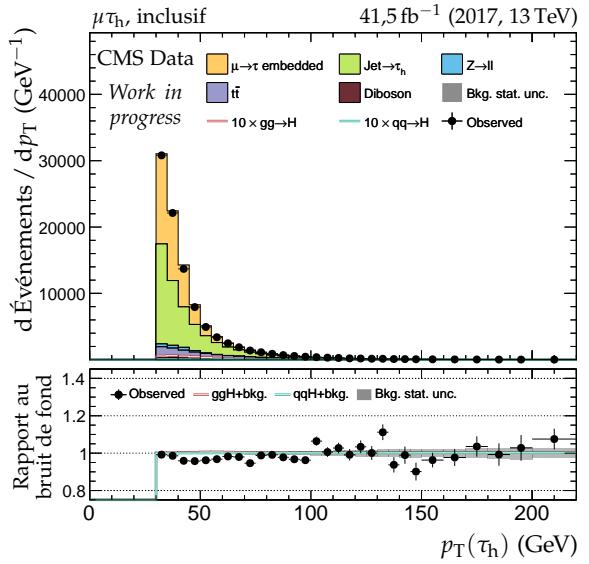

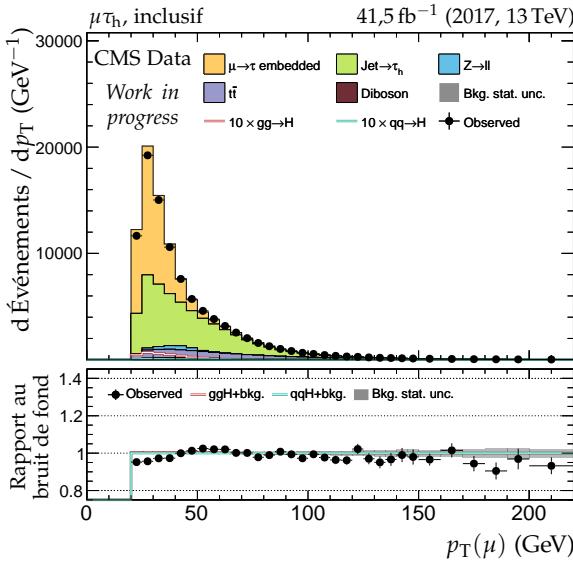

Figure X.34 – Canal $\mu\tau_h$, 2017 : cinématique des leptons (μ, τ_h).

(a) Énergie transverse manquante.

(b) Masse transverse du dilepton.

(c) Impulsion transverse du dilepton.

(d) Masse visible du dilepton.

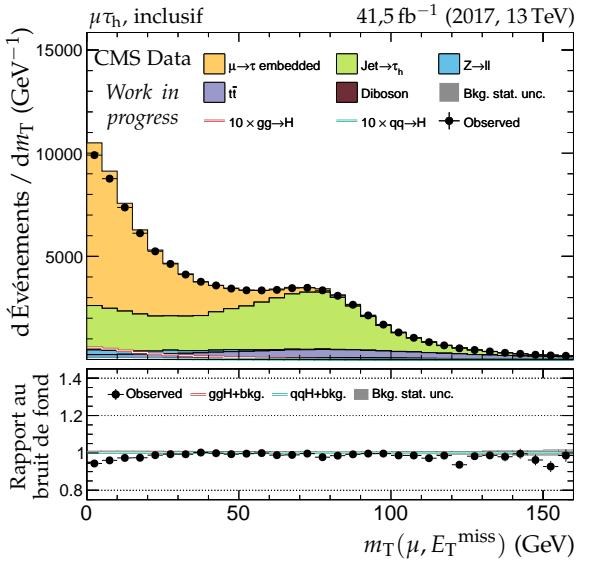

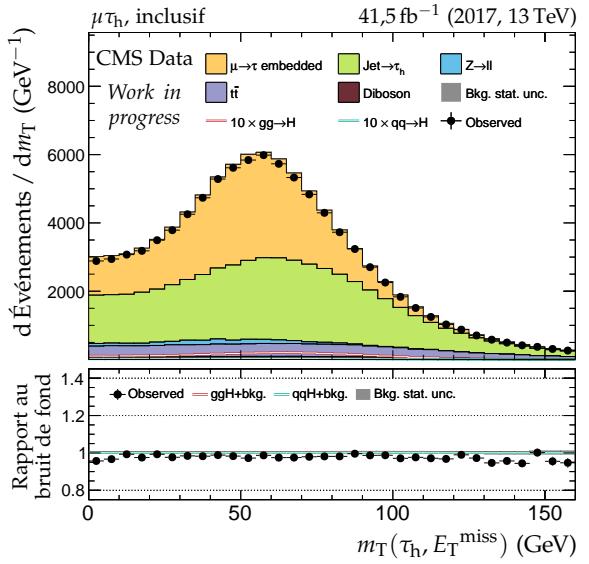

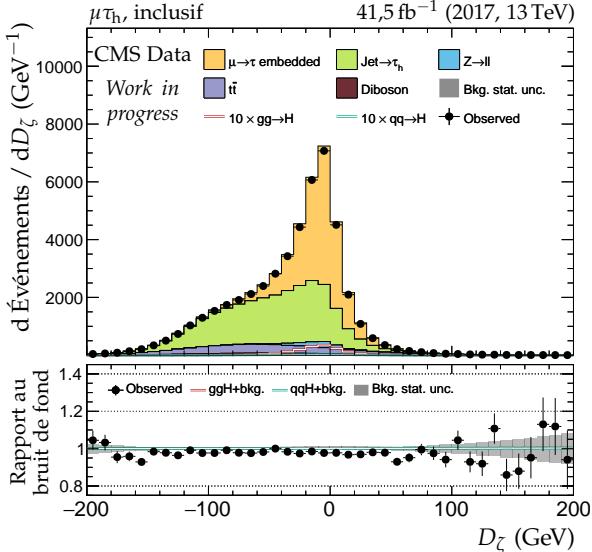

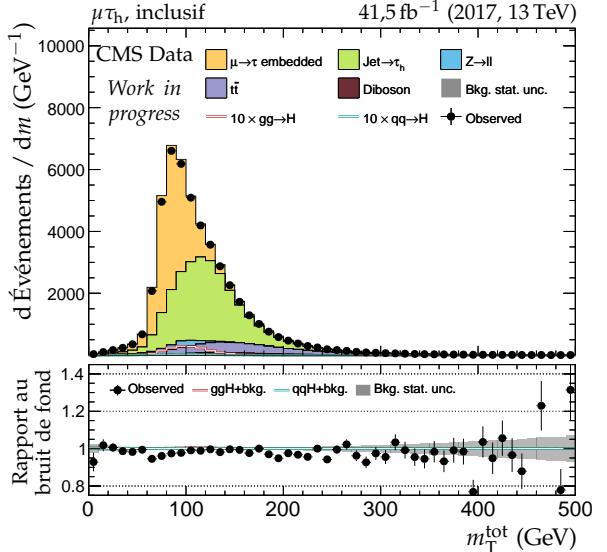

(e) Impulsion transverse du système di- τ .

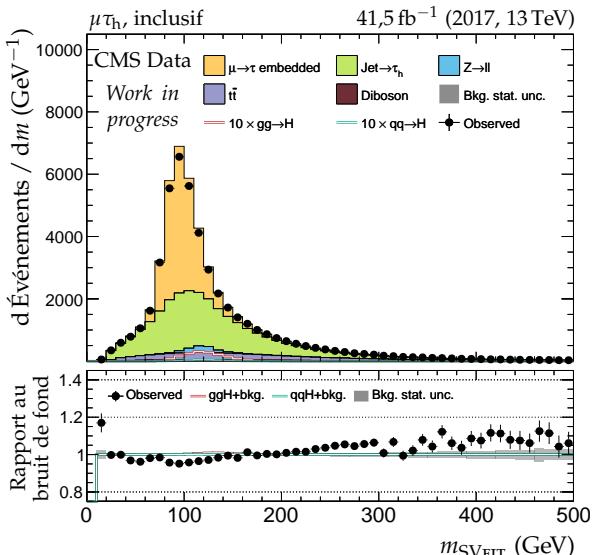

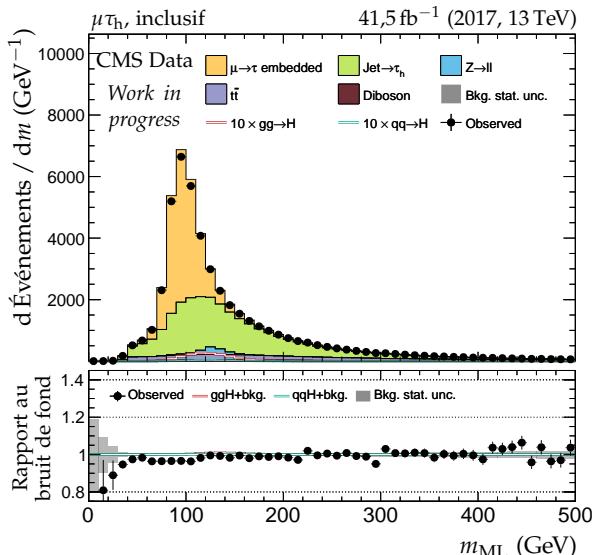

(f) Distance ΔR entre les leptons (μ, τ_h).

Figure X.35 – Canal $\mu\tau_h$, 2017 : dilepton et énergie transverse manquante.

(a) Masse transverse du lepton 1 (μ).(b) Masse transverse du lepton 2 (τ_h).(c) Valeur de D_ζ .

(d) Masse transverse totale.

(e) Masse du système di- τ d'après SVFIT.(f) Masse du système di- τ d'après le ML.**Figure X.36 – Canal $\mu\tau_h$, 2017 : masses transverses, D_ζ et masses.**

(a) Impulsion transverse du jet principal.

(b) Impulsion transverse du jet secondaire.

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

(e) Angle azimutal du jet principal.

(f) Angle azimutal du jet secondaire.

Figure X.37 – Canal $e\tau_h$, 2017 : cinématique des deux jets principaux.

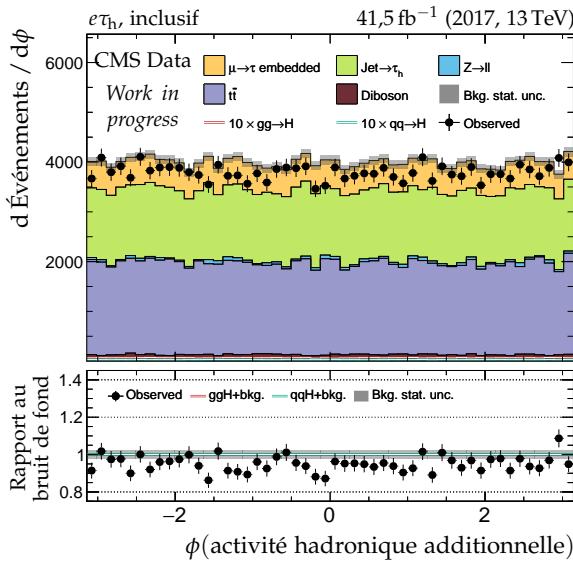

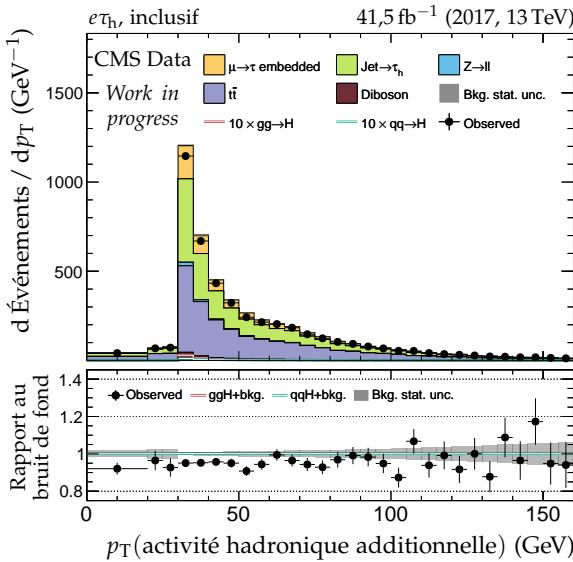

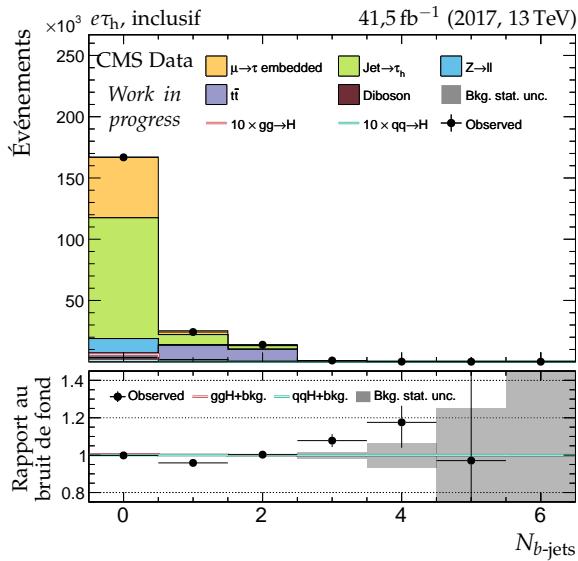

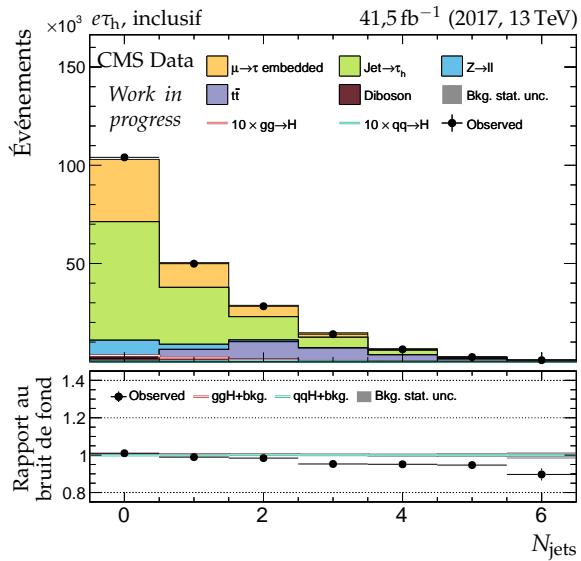

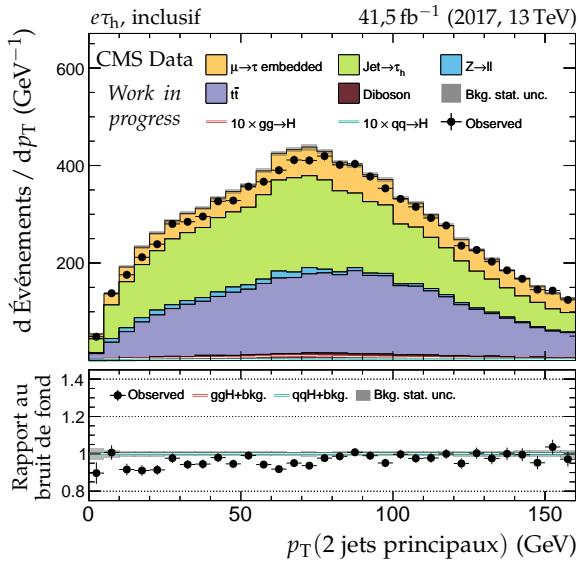

Figure X.38 – Canal $e\tau_h$, 2017 : b-jets et activité hadronique additionnelle.

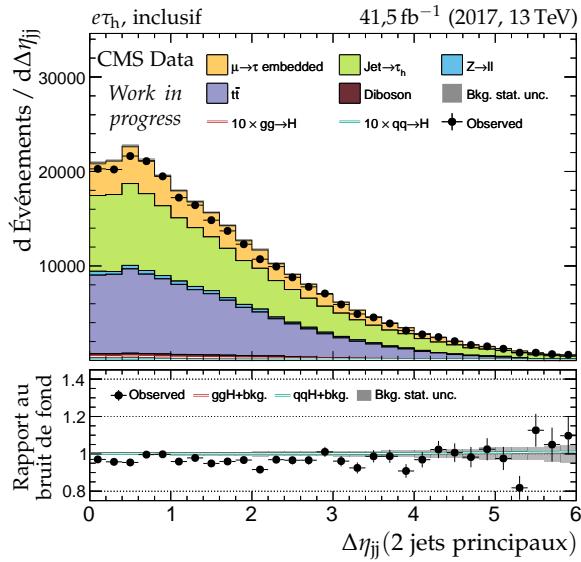

(a) Nombre de b -jets.

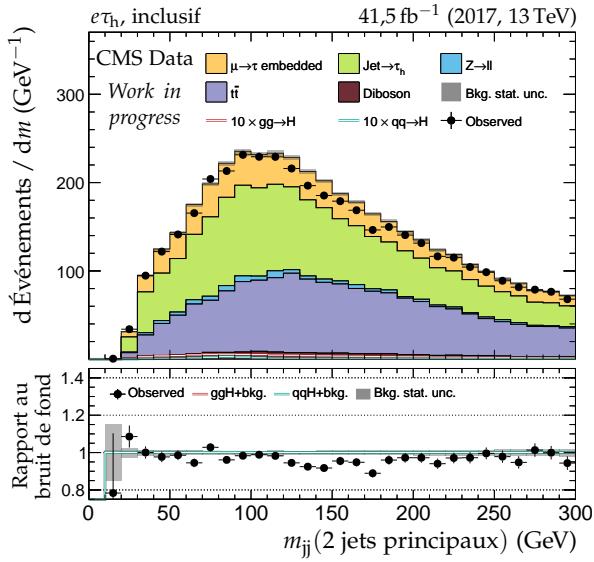

(b) Nombre de jets.

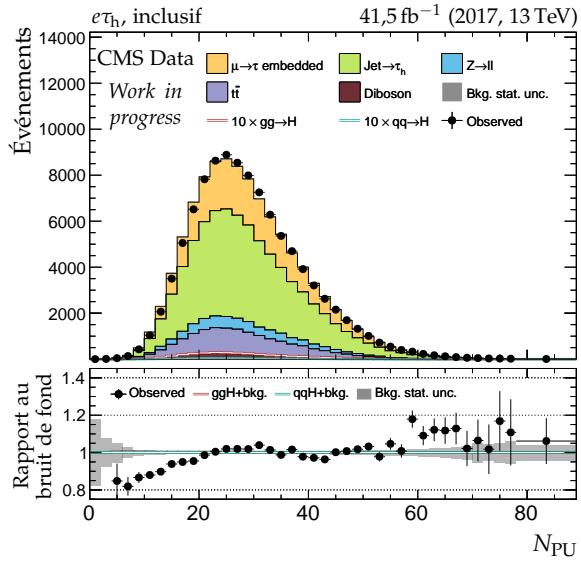

(c) Impulsion transverse du système des deux jets.

(d) Distance en η entre les deux jets.

(e) Masse invariante du système des deux jets.

(f) Nombre de vertex d'empilement.

Figure X.39 – Canal $e\tau_h$, 2017 : nombre de jets, système des deux jets principaux et empilement.

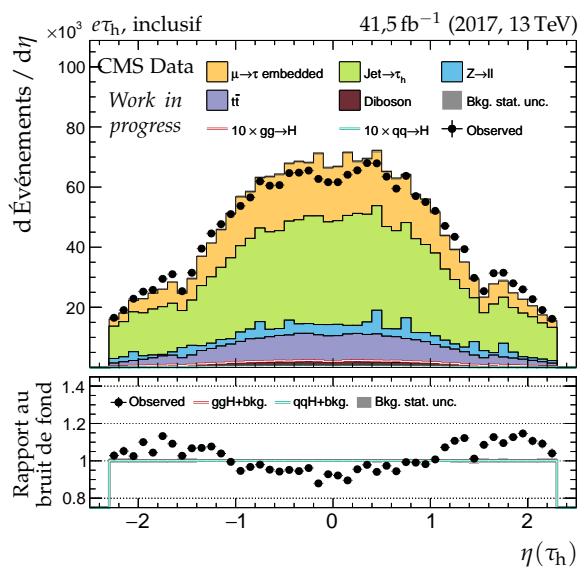

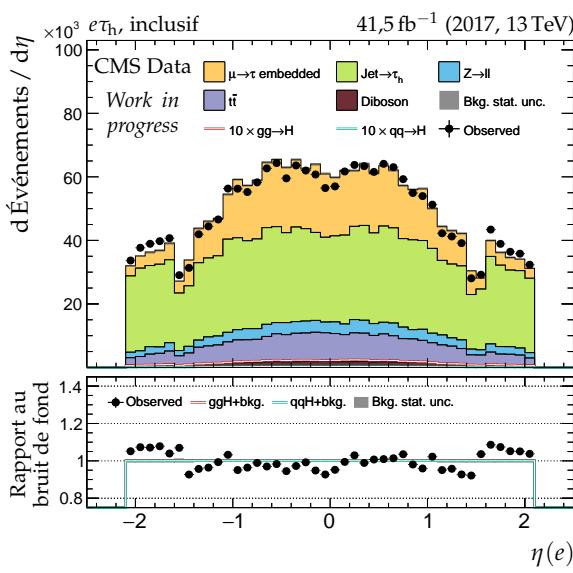

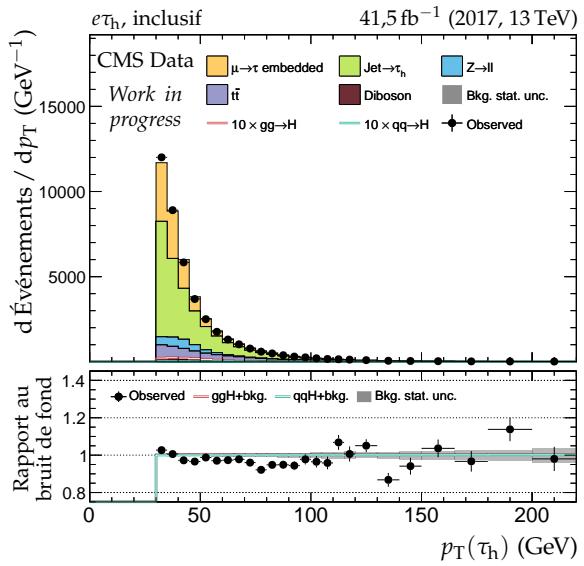

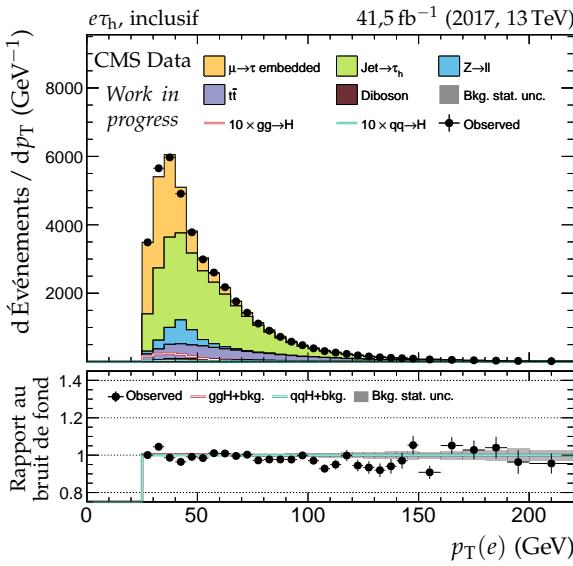

Figure X.40 – Canal $e\tau_h$, 2017 : cinématique des leptons (e, τ_h).

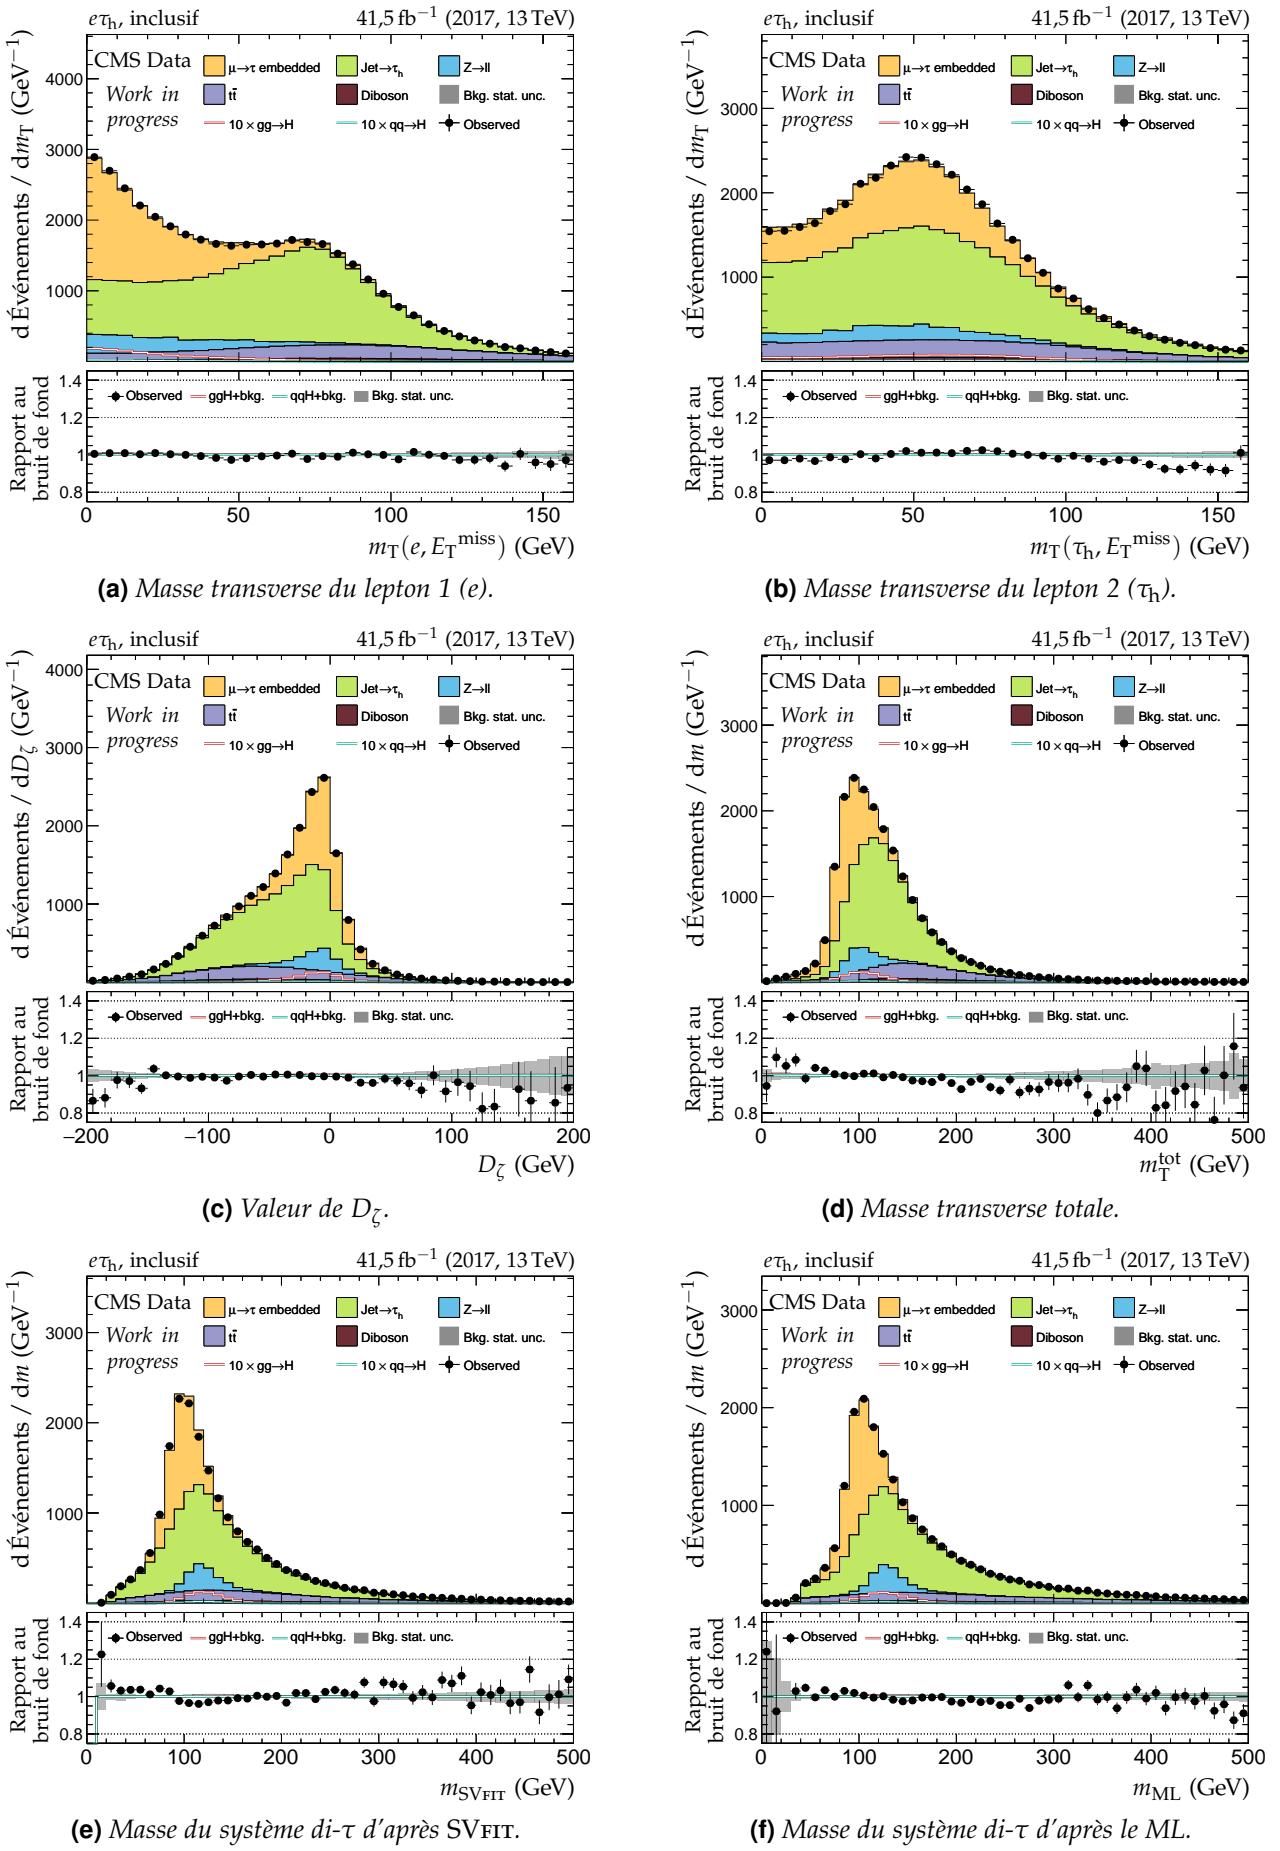

Figure X.41 – Canal $e\tau_h$, 2017 : dilepton et énergie transverse manquante.

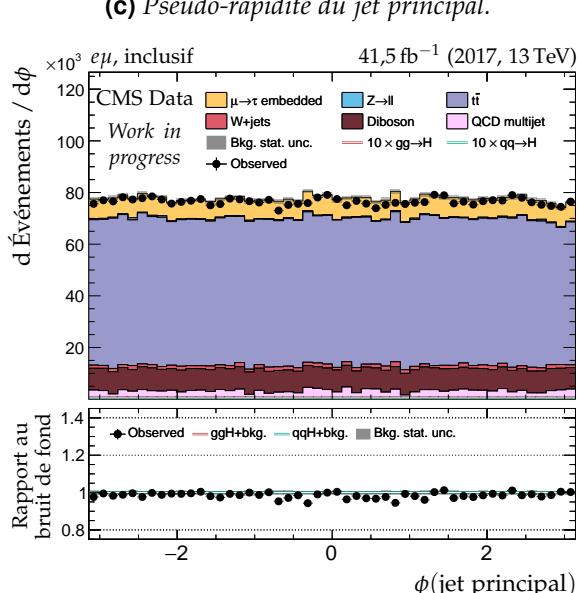

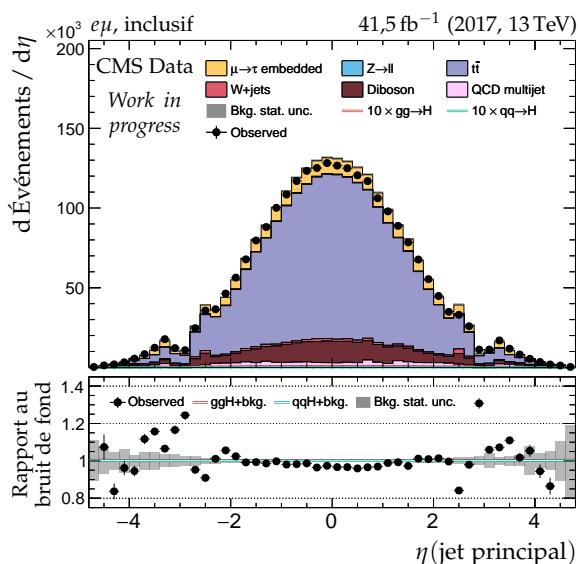

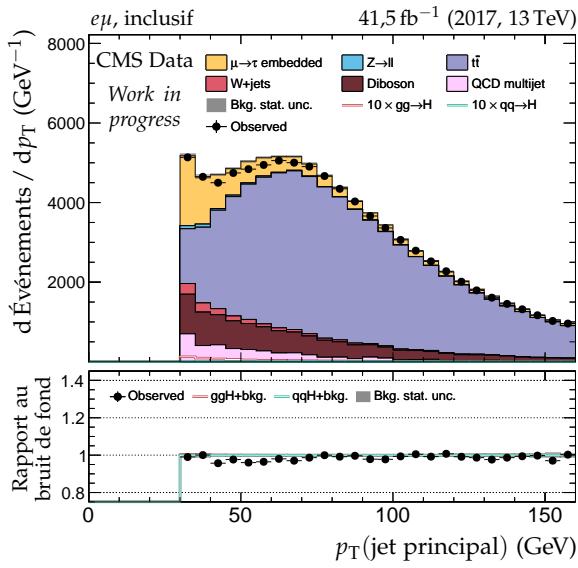

Figure X.43 – Canal $e\mu$, 2017 : cinématique des deux jets principaux.

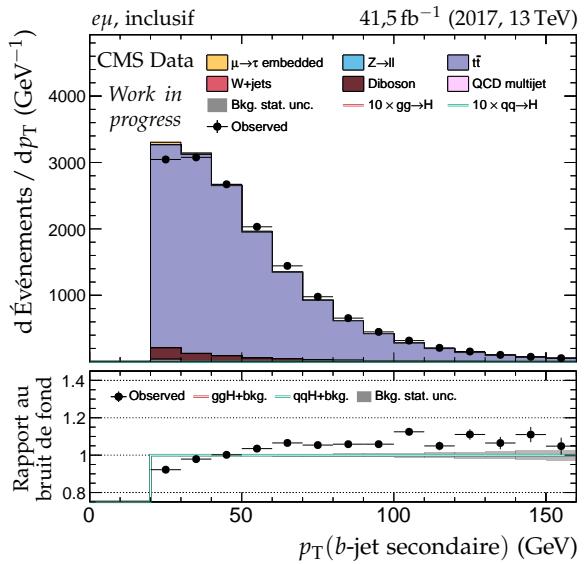

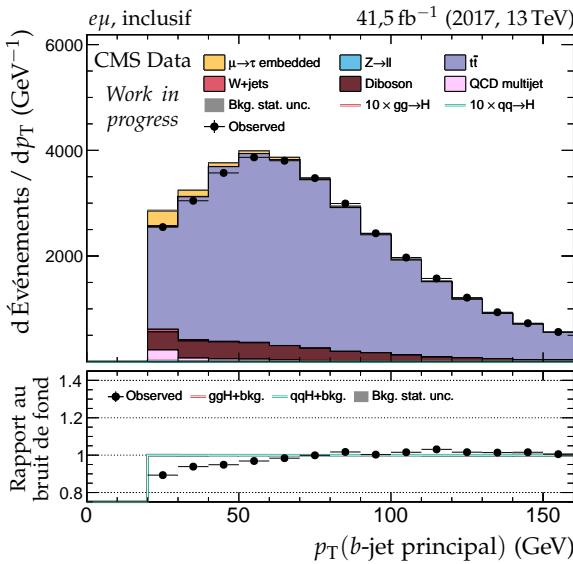

Figure X.44 – Canal $e\mu$, 2017 : b-jets et activité hadronique additionnelle.

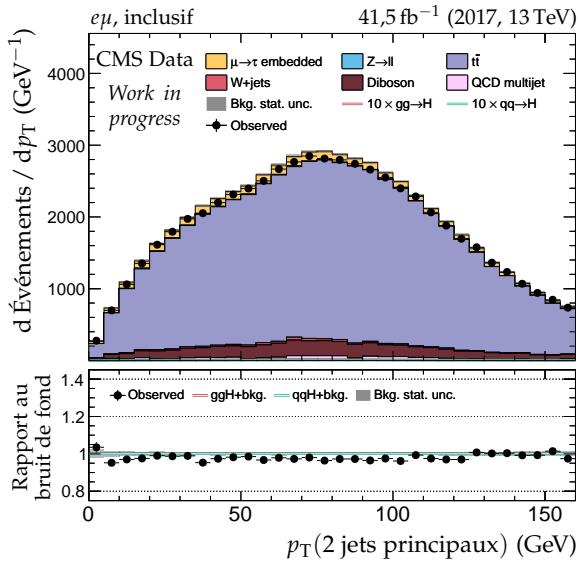

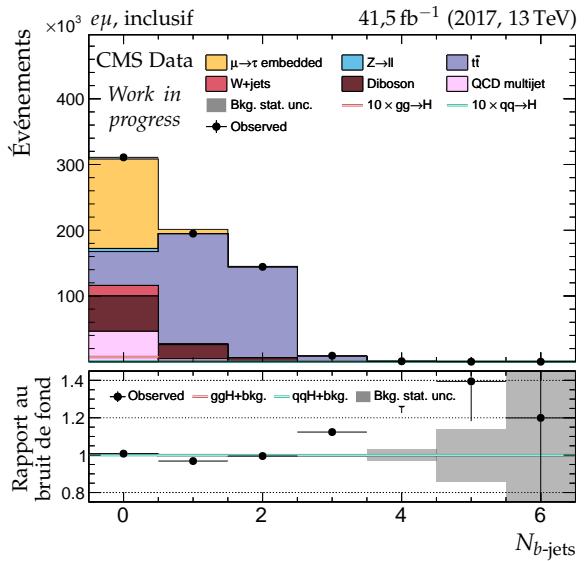

Figure X.45 – Canal $e\mu$, 2017 : nombre de jets, système des deux jets principaux et empilement.

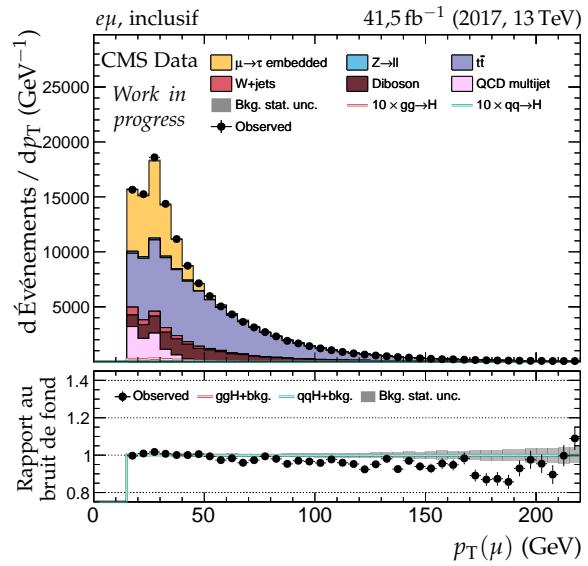

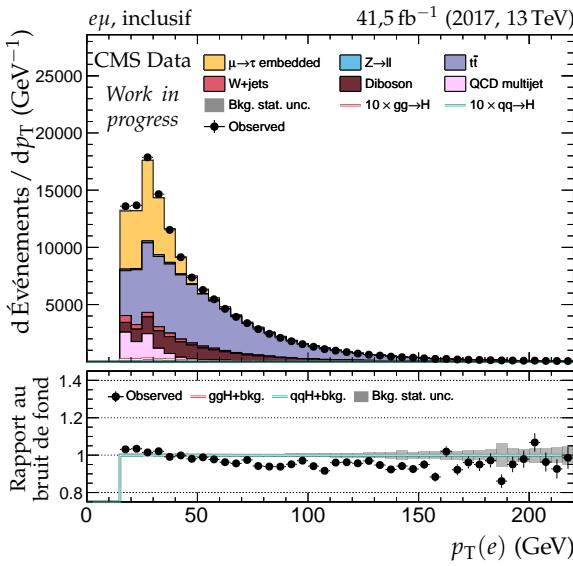

Figure X.46 – Canal $e\mu$, 2017 : cinématique des leptons (e, μ).

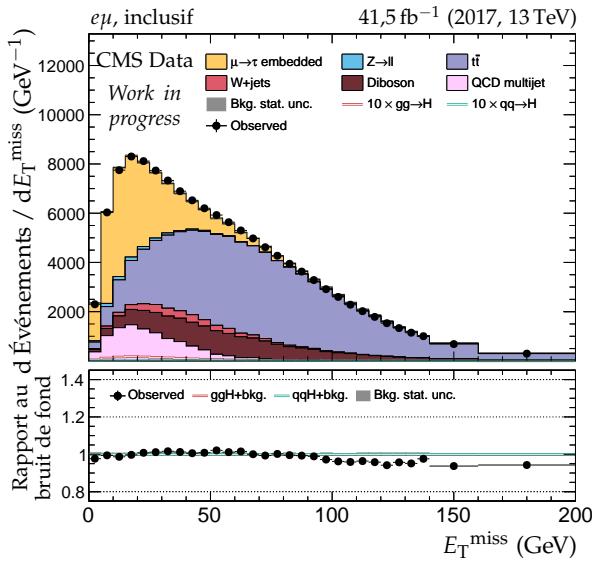

Figure X.47 – Canal $e\mu$, 2017 : dilepton et énergie transverse manquante.

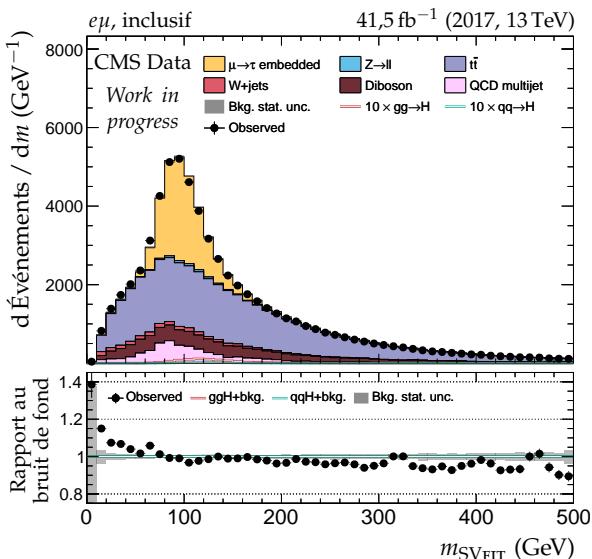

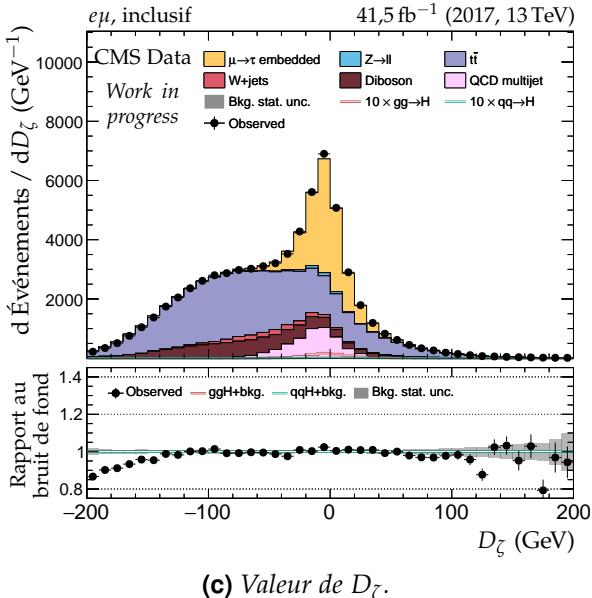

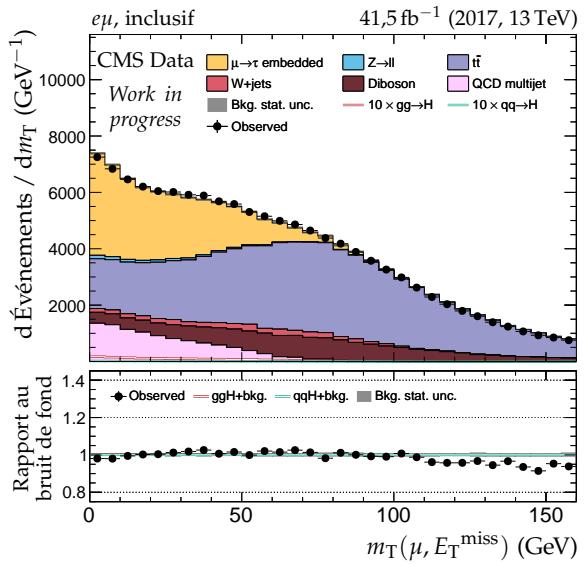

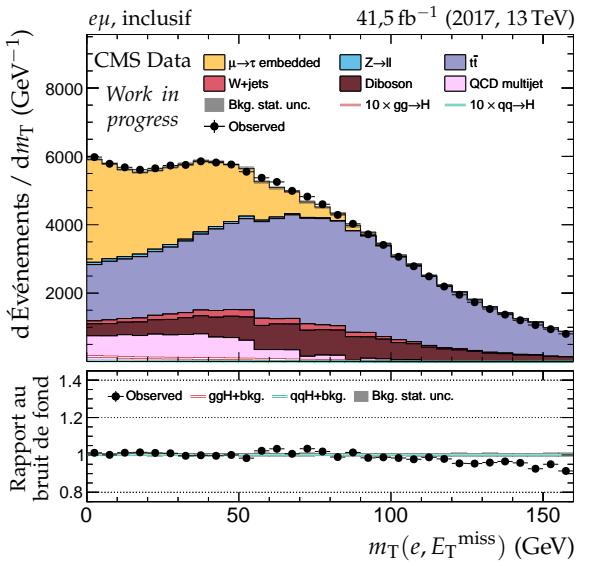

Figure X.48 – Canal $e\mu$, 2017 : masses transverses, D_ζ et masses.

(a) Impulsion transverse du jet principal.

(b) Impulsion transverse du jet secondaire.

(c) Pseudo-rapidité du jet principal.

(d) Pseudo-rapidité du jet secondaire.

(e) Angle azimutal du jet principal.

(f) Angle azimutal du jet secondaire.

Figure X.49 – Canal $\tau_h \tau_h$, 2018 : cinématique des deux jets principaux.

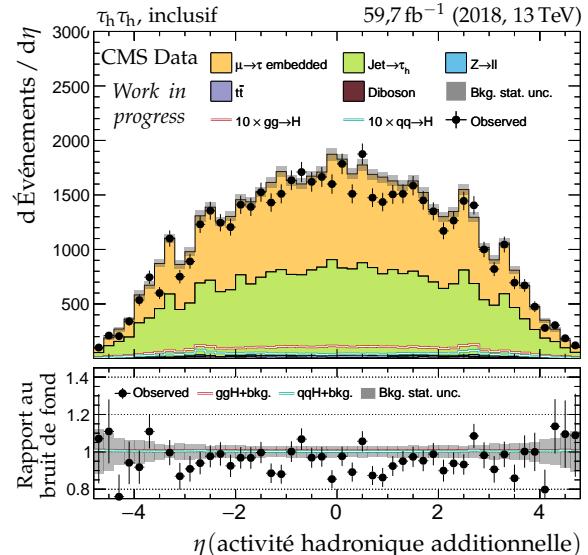

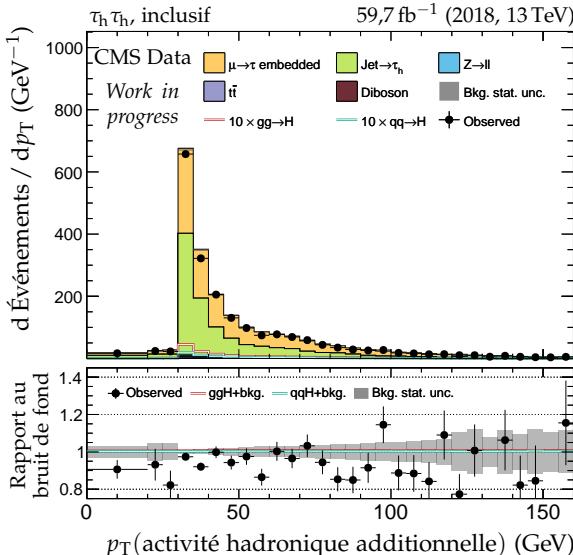

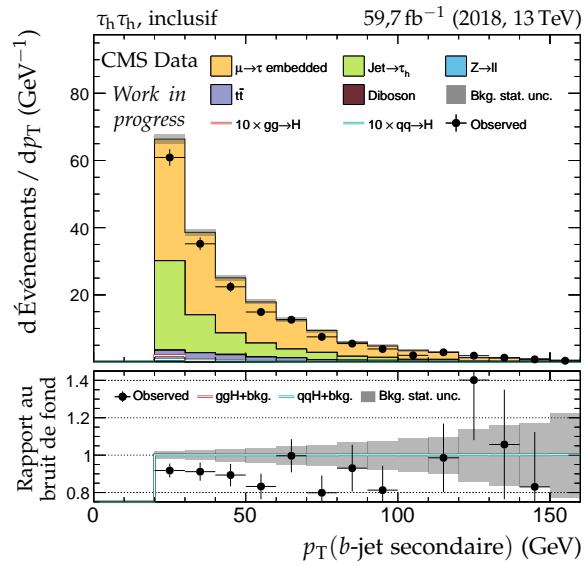

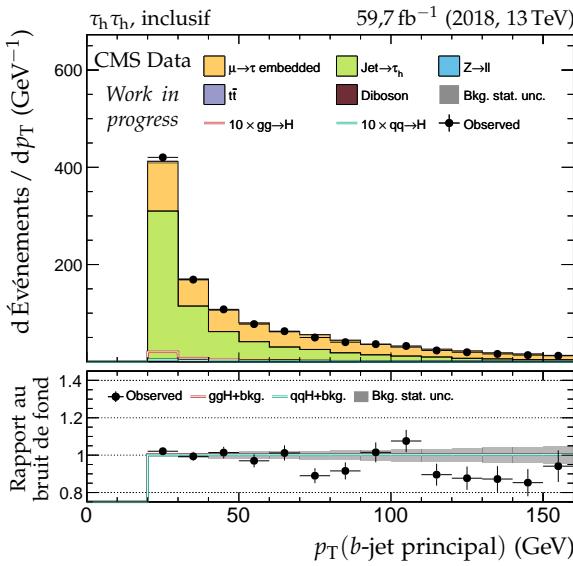

Figure X.50 – Canal $\tau_h \tau_h$, 2018 : b-jets et activité hadronique additionnelle.

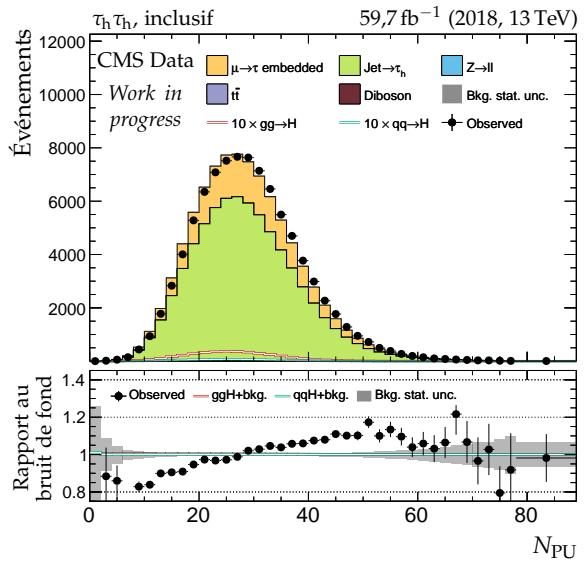

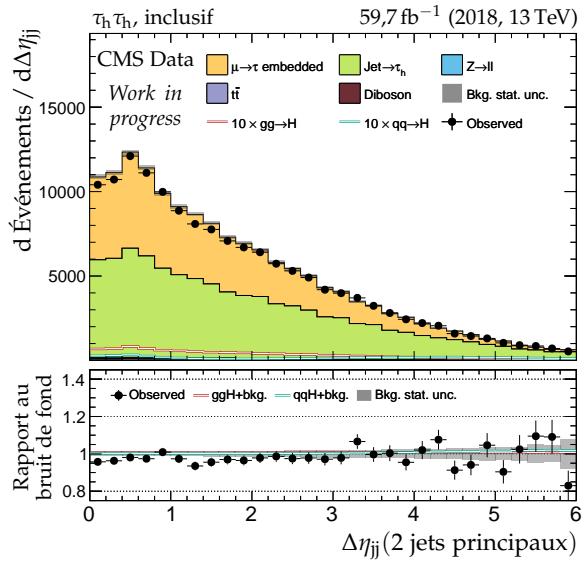

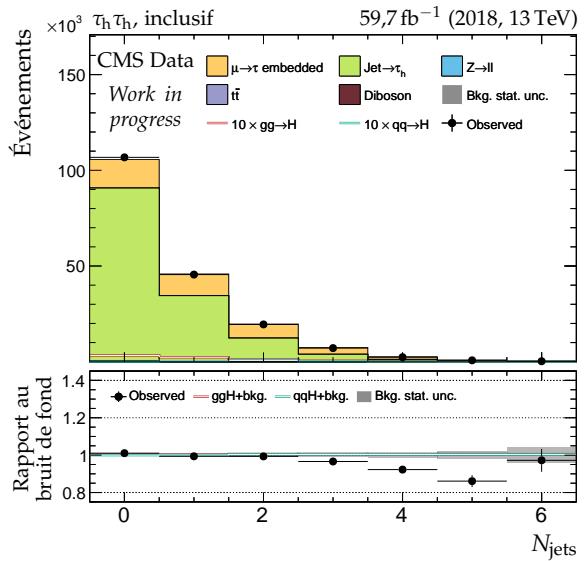

Figure X.51 – Canal $\tau_h \tau_h$, 2018 : nombre de jets, système des deux jets principaux et empilement.

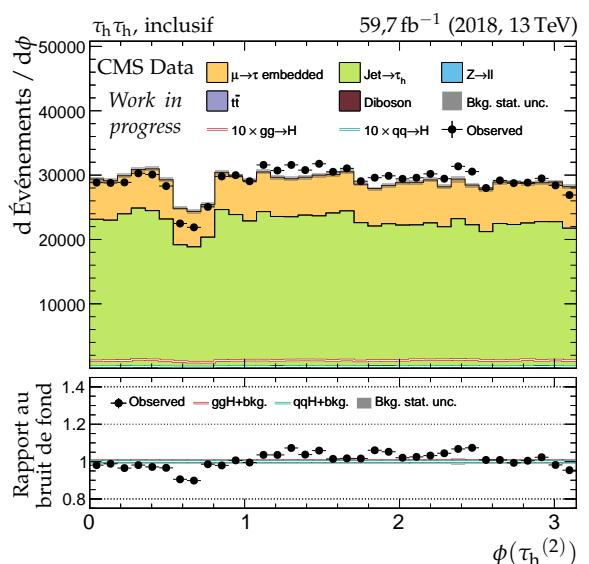

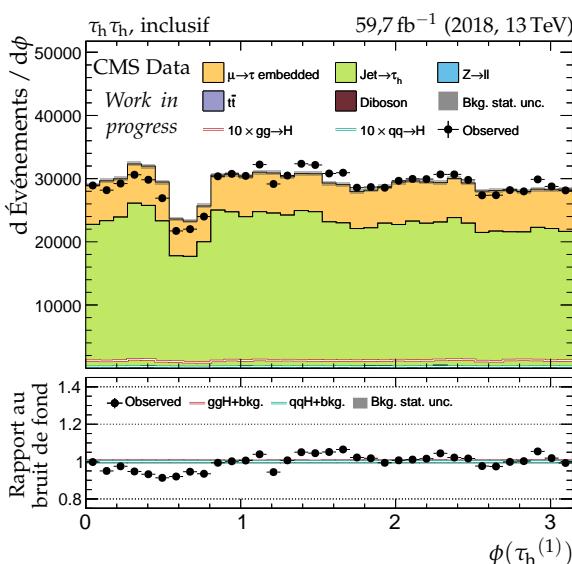

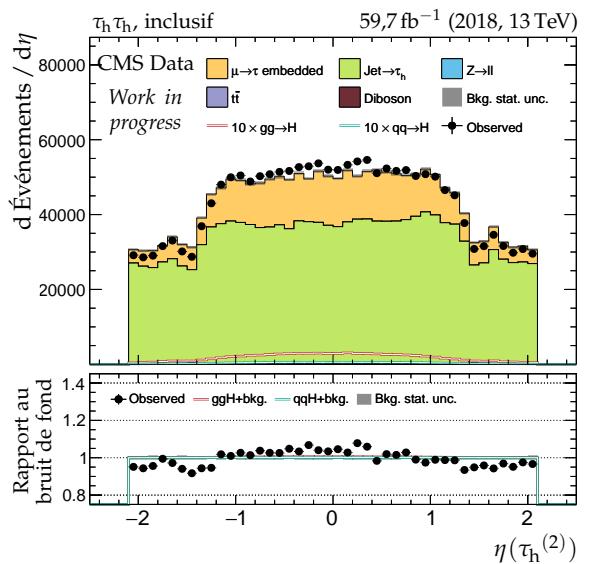

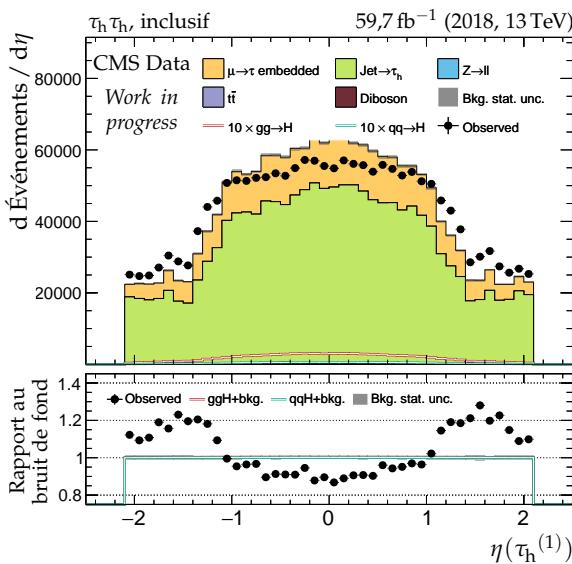

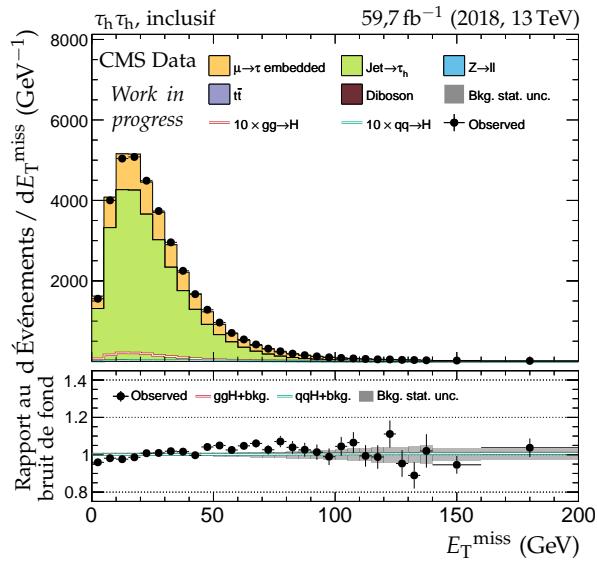

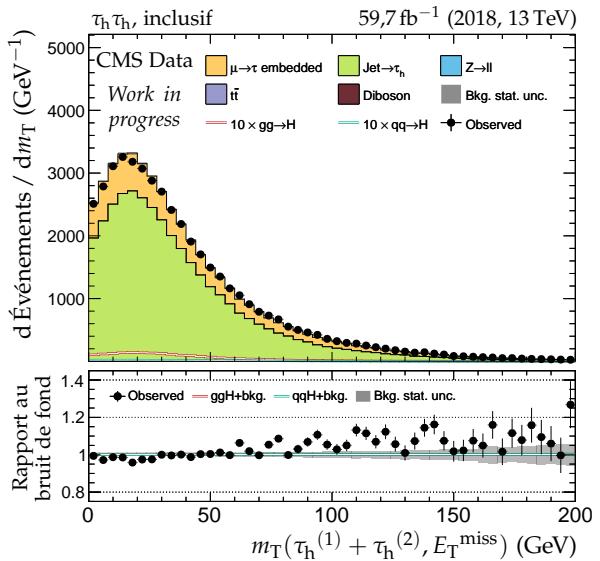

Figure X.52 – Canal $\tau_h \tau_h$, 2018 : cinématique des leptons ($\tau_h^{(1)}, \tau_h^{(2)}$).

(a) Énergie transverse manquante.

(b) Masse transverse du dilepton.

(c) Impulsion transverse du dilepton.

(d) Masse visible du dilepton.

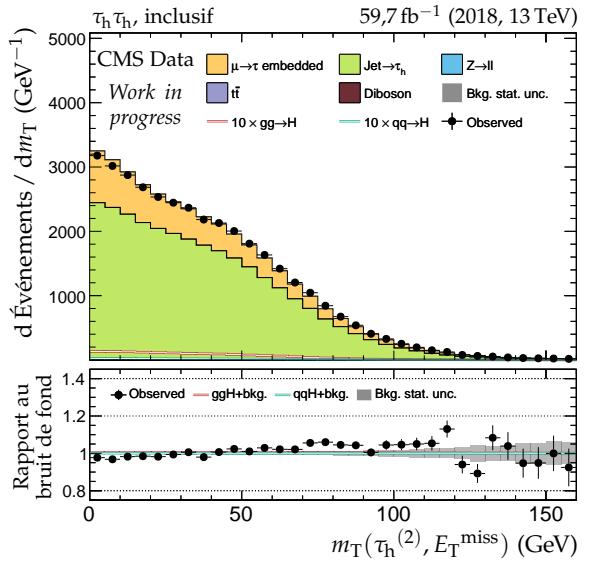

(e) Impulsion transverse du système di- τ .

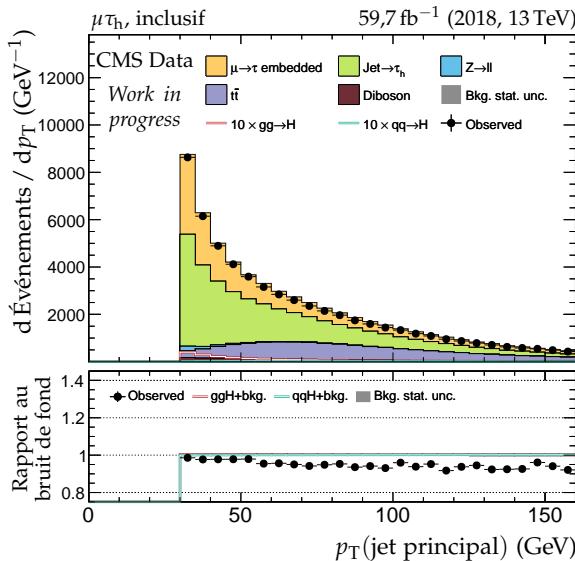

(f) Distance ΔR entre les leptons ($\tau_h^{(1)}, \tau_h^{(2)}$).

Figure X.53 – Canal $\tau_h \tau_h$, 2018 : dilepton et énergie transverse manquante.

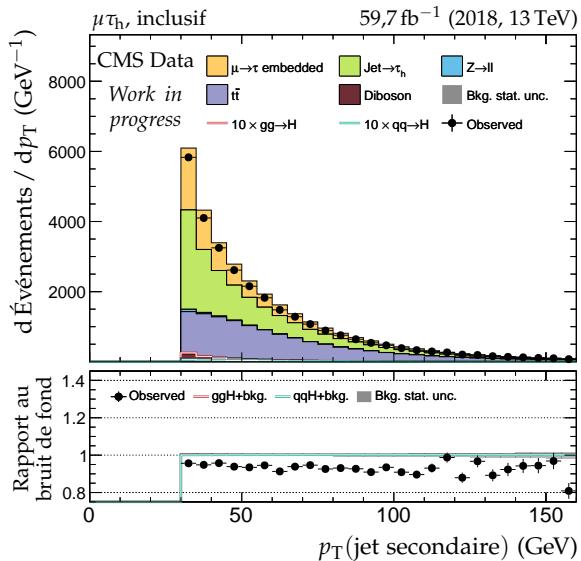

(a) Masse transverse du lepton 1 ($\tau_h^{(1)}$).(b) Masse transverse du lepton 2 ($\tau_h^{(2)}$).(c) Valeur de D_ζ .

(d) Masse transverse totale.

(e) Masse du système di- τ d'après SVFIT.(f) Masse du système di- τ d'après le ML.Figure X.54 – Canal $\tau_h \tau_h$, 2018 : masses transverses, D_ζ et masses.
